Important Discovery. CONSUMPTION, and all diseases of the LUNGS and THROAT are positively curable by INHALATION, which convers the remedies to the cavities in the lungs through the air passa ges, and coming in direct contact with the disease neutralizes the tubercular matter, allays the cough causes a free and easy expectoration, heals the lungs, purifies the blood, imparts renewed vitality

is curable by Inhalation, is to me a source of unalloyed pleasure. It is as much under the control of medical treatment as any other formidable dis ease; 90 out of 100 cases can be cured in the 1st stages, and 50 pr et. in the 2nd: but in the 3rd stage it is impossible to save more than 5 pr et.

for the lungs are so cut up by the disease as to bid defiance to medical skill. Even, however, in the last stages, INHALATION affords relief to the suffering attending this fearful scourge, which annually destroys 95,000 persons in the U.S. alone; and a correct calculation shows that of the present opulation of the earth, 80,000,000 are destined to fill the consumptive's graves. Truly the quiver of death has no arrow so fa-

tal as Consumption. In all ages it has been the great enemy of life, for it spares neither age nor sex, but sweeps off alike the brave the beautiful, BONNETS, Bonnet Ribbons and sex, but sweeps off alike the brave the beautiful, graceful and gifted. By the help of the Supreme Being from whom cometh every good and perfect gift, I am enabled to offer to the afflicted ROCKERY. of the Latest Patterns and a permanent and speedy cure in Consumption.
The first cause of tubercles is from impure blood, and the immediate effect produced by their deposition in the lungs is to prevent the free admission of air into the air cells, which causes a weakened vitality thro' the entire system. Then surely it is more rational to expect greater good from edicines entering the cavities of the lungs than from those administered through the stomach; the patient will always find the lungs free and the breathing easy, after inhaling the remedies. A convining proof of the constitutional effects of inhala tion, is the fact that sickness is always produced by breathing foul air-is not this positive evidence that proper remedies, carefully prepared and judiciously administered through the lungs should produce the happiest result? During 18 years mactice, many thousands suffering from diseases of the lungs and throat, have been under my care, and I have effected many remarkable cures, even after the sufferers had been pronounced in the last stages, which fully satisfies me that Con-sumption is no longer a fatal disease. My treat ment of Consumption is original, and founded on long experience and a thorough investigation. My perfect acquaintance with the nature of tuercles, etc., enables me to distinguish, readily. the various forms of disease that simulate Consumption, and apply the proper remedies, rarely being mistaken even it a single case. This famliarity, in connection with certain Pathological and microscopic discoveries, enables me to relieve the lungs from the effects of contracted chests, to enlarge the chest, purify the blood, impart to it renewed vitality, giving energy and tone to the

entire system. Medicines with full directions sent to any part of the United States and Canadas, by patients communicating their symytoms by letter.
