The first cause of tubercles is from impure blood, and the immediate effect produced by their deposition in the lungs is to prevent the free admis-sion of air into the air cells, which causes a weakened vitality thro' the entire system. Then surely it is more rational to expect greater good from medicines entering the cavities of the lungs than from those administered through the stomach; the patient will always find the lungs free and A LL who wish to buy nooks and STATIONERY the breathing easy, after inhaling the remedies.
