Important Discovery.

CONSUMPTION, and all diseases of the LUNGS and THROAT are positively curable by INHALATION, which conveys the remedies to the cavities in the lungs through the air passas ges, and coming in direct contact with the disease neutralizes the tubercular matter allays the cough causes a free and easy expectoration, heals after lungs, purifies the blood, imputs renewed vitality 3523,057 07. Invested in Bonds, Mortages, and to the nervous system, giving that energy so indispensable for the restoration of the health. To be able to state confidently that Consumption is curable by Inhabition, is to me a source of analloyed pleasure. It is as much under the control of medical treatment as any other formidable disease; 90 out of 100 cases can be cured in the 1st stages, and 50 pr et. in the 2nd; but in the 3rd Fit Premiums, - - - - 169.796 61 visited Europe, Asia, Africa and South America stage it is impossible to save more than 5 pr et ... for the langs are so cut up by the disease as to bid defiance to medical skill. Even, however, in the last stages, INHALATION affords relief to Paid Marine Losses, 864.427 04 the suffering attending this fearful scourge, which | Paid Fire do. . . 39,737 89 annually destroys 95.000 persons in the U.S. alone: Expenses, Salaries and and a correct calculation shows that of the present

Promiums & Agen-Truly the quiver of death has no arrow, so fatal as Consumption. In all ages it has been the great enemy of life, for it spares neither age nor sex, but sweeps off alike the brave the beau, ful, graceful and gifted. By the help of the Sapreme Being from whom cometh every good and perfect gift, I am enabled to offer to the afflicted a perminent and speedy cure in Con-amption. The first cause of tubercles is from hipure blood. and the immediate effect produced by their deposition in the lungs is to prevent the tree admission of air into the air cells, which causes a weakened ritality thro' the entire system. Then surely it is more rational to expect greater good from medicines entering the cavities of the lungs than from those administered through the stomach; the patient will always find the lungs free and the breathing easy, after inhaling the remedies: Thus, Inhalation is a local remedy, nevertheless it acts constitutionally, and with more power and certainty than remedies administered through the stomach. To prove the powerful and direct influence of this mode of administration, chloroform inhaled will entirely destroy sensibility in a few minutes, paralyzing the entire nervous sytem. so that a limb may be amputated without the slightest pain; inhaling the ordinary barning gas will destroy life in a few hours. The inhalation of ammonia will arouse the sys

tem when fainting or apparently dead. The od. or of many of the medicines is perceptible in the skin a few minutes after being inhaled, and mag ring proof of the constitutional diffects of inhala MENT upon the adjustment of Losses under Polition, is the fact that sickness is always produced cless issued by the m. by breathing foul air-is not this positive evidence that proper remedies, carefully prepared and judicionsly administered through the lungs should produce the happiest result? During 18 years instant. practice, many thousands suffering from diseases of the lungs and throat, have been under my care and I have effected many remarkable cures, even after the sufferers had been pronounced in the last stages, which fully satisfies me that 'Consumption is no longer a fatal disease. My treat ment of Consumption is original, and founded on long experience and a thorough investigation. My perfect acquaintance with the nature of the bereles, etc., enables me to distinguish, readily. the various forms of disease that simulate Consumption, and apply the proper remedies, rarely being mistaken even in a single case. This familiarity, in connection with certain Pathological and microscopic discoveries, enables me to relieve the lungs from the effects of contracted chests. to enlarge the chest, parity the blood, impart to it senewed vitality, giving energy and tone to the

[Successon to A. & E. BALDWIN.] bet of the materia medica, and are equally as Manufacturer of Saddles, Harnesses, and Trunk and Carriage Trimmer,

Above we present you with a likeness of Di MORSE- the inventor of MORSE'S INDIAN ROOT PILLS. This philanthropist has spect the greater part of his life in travelling, having Interest on Loans, - - - - 8,704 47 -spent 3 years among the Indians of our West-ern country, it was in this way that the Indian Total Receipts, - - - - \$400,185 68 Root Pills were first discovered. Dr. Morse was the first man to establish the fact that all diseases arise from mirunity of the blood-that our strength, health and life depend upon this fluid. When the various passages become clagged, and do not act in perfect harmony with the different functions of the body, the blood loses its acion, becomes thick, corrupted and diseased; thus causing pains sickness and distress of every name; our strength is exhausted, we are depriv ed of our health, and if nature is not assisted in throwing off the stagnant humors, the blood will become stagnant and cease to act, and thus our light of life be forever blown out. How important 1s it then to keep the passages of the body free and open. And how plescant to us to be able to put a medicine in your reach, viz. Morse's Indian Root Pills, made from plants and roots that grow around the mountain cliffs in Nature's garden, for the health and comfort of diseased man. One of the roots from which these Pills are made is a Budorific, which opens the pores of the Skin, and assists Nature in throwing off the finer portions of corruption within. The second which is a plant is an Expectorant, that opens and unclogs the passage to the lungs, and thus, in a soothing manner, performs its duty by throw ing off phlegm, and other humors from the lungs copious spitting. The third is a Diareticwhich gives ease and double strength to the kid-neys; thus encouraged, they draw large amounts of impurities from the blood, which is then thrown out bountifully by the urinary or water passage, and which could not have been discharged in any other way. The fourth is -\$523,057 07 | Cathartic, and accompanies the other properties of the Pills while engaged in purifying the blood. the coarser particles of impurity which cannot Bates consistent with Security, and upon the pass by the other outlets, are thus taken up and be immediately detected in the blood. From the above, it is shown that Dr. Morse's Indian Root Pills not only enter the stomach but become united with the blood, for they find way to every part, and completely cleanse the system from all impurity, and the life of the body which is the blood, becomes perfectly healthy: consequently all sickness and pain is driven from the system, for they cannot remain when the hody becomes so pure and clear. The reason why ocple are so distressed when sick, and so men die, is because they do not get a medicine that will pass to the afficted parts, and which will o-pen the natural passages for the disease to be cast out, hence, a small quantity of food and other matter is lodged, and the stomach and inteslines are literally overflowing with the corrupted mass; thus undergoing disagreeable fermentation, constantly mixing with the blood, which throws the corrupted matter through every vein and artery, until life is taken from the body by disease. Dr. Morse's PLLLS finve added to ernacle when for 10 surcessive nights, over themselves victory upon victory, by restering milions of the sick to health and happiness. Ever Invented THE undersigned is now prepared to furnish to FARMERS, Millers and others the world renowned Excelsior Carn Sheller-the wonder of the times-being the best, most durable, and easiest running Sheller now in use. Warranted to shell more corn in a shorter space of time. than any other machine, entirely cleaning the ear, from end to end, without crushing either

The Machines are constructed with two cranks, and pully for a belt, so that two persons can turn them, or attach a belt in motion by any power. The attention of persons owning mills, is solicited, as the Machines are wonderfully adapted to any kind of power. They are very easily turned, and when once in motion a small boy can turn them; they are capable of shelling one bushel per minute-every Farmer should have one-as they save their cost, in

THIS is to certify, that I have examined and used one of the above Shellers, for sale by D. WM. Neal, D. SEARLE, and unhesitatingly pronounce it, one of the best, most durable and ensiest running Shellers ever introduced into this county. It will shell more corn in a shorter time than any other Machine, and is always ready for service. I most heartily and freely recommend them to the Farmers of Susq'a County, as the cheapest and best Sheller, now in use. I have one in operation in my mill in Dimock, which needs only to be seen to recommend itself. Call and AMMI ELY. Brooklyn, December 11th, 1856.
