HOW HE CAME TO BE MARRIED. LITTLE & HARDING'S COLUMN. It may be funny, but I've done it. I've got a rib and a baby. Shadows departedbyster stowe, brandy cock-tails, cigar boxes, boot jacks, absconding shirt buttons, whist and dominoes. Shadows present-hoop skirts, band boxes, sibbons, gaiters, long stockings, juvinile dreises, tin trumpets, little willow chairs, cradles, bibs, pap, sugar teats, paregoric, hive syrup, thurbarb senna, salts, squill-, and doctor's bills. Shadows future-more nine pound babies, more hive syrup, etc. etc. I'll just tell you how I got caught. I was always the darndest, most tea custard, bashful fellow you ever did see: it was kinder in my line to be taken with the shakes every time I saw a pretty gal approaching me, and I'd cross the street any time rather than face one: 'twasn't because I didn't like the critters, for if I was behind the fence looking through a knothole, I couldn't look at one long enough. Well, my sister Lib gave a party one night, and I stayed away from home because I was too bashful to face the music. I hung around the house whistling "Old Dan Tucker," dancing to keep my feet warm, watching the heads bobbing up and down the window curtains, and wishing the thundering party would break up so that I could get to my room. I smoked up a bunch of cigars, and as it was getting late and mighty uncomfortable, I concluded to shin up the door post. No sconer said than done, and I soon found myself snug in bed. "Now," says I, "let her rip! Dance till your wind gives out!" And enddling under the quilts, Morphens grabbed me. I was dreaming of soft-shell crabs and stewed tripe and was having a good time, when somebody knocked at the door and woke me up. "Rap," again. I laid low. "Rap, rap, rap." Then I heard a whis pering and I knew there was a whole raft of girls outside. "Rap, rap!" Then Lib sings ont "Jack, are you in there!" "Yes," says I. Harge and Splendid Stock of Then came a roar of laughter. "Let us in," says she. "I won't," says I, "can't you let a fellow alone?" "Are you a-bed?" says she. "I am, says I. "Get up," says she. "I wou't," says I. Then came another laugh. By thunder! I began to get rilled. "Get out, you petticoated scarecrows!" I cried, "can't you get a beau without hauling a fellow out of bed ! I won't go home with you-I won'tso you may clear out!" And, thowing a boot at the door, I felt better. But, presently, oh! mortal buttons! I heard a still, small voice, just received by very much like sister Lib's, and it said: "Jack, you'll have to get up, for all the girls' things are in there!" Oh, Lord, what a pickle! Think of me in bed, all covered with shawls, which we have not time to mention. Enough muffs, bonnets and cloaks, and twenty girls to say, we have almost anything, and eveoutside the door waiting to get in! If I had stopped to think I should have pancaked on country—all of which we are determined t. the spot. As it was, I rolled out among the turn into cash, in the very shortest possible bonnet-wire and ribbons in a hurry. "Smash!" time and we herewith issue a went the millenry in every direction. The Mugnetic Belt. THE undersigned, after many years of careful research and experiment, have discovered and perfected a safe, convenient and unexception able means of completely controling the maternal function, without employing any of the unnatural and deleterious expedients so often resorted to for that purpose. Apart from its specifi: use of estoring to health and vigor the abused, deranged and enfeebled procreative functions of females, and of reinvigorating and restoring the general health to it, wonted constitutional integrity. It consists of a Magnetic Belt, which encircles the body directly over the os illium, by the magnetic action of which the fecundating power is intercepted and held in abeyance, and the vital neuromagnetic currents, otherwise drained off by sexual excesses, are turned back thro' the system, stimulating all the viscers to a healthy normal tone. In a true moral aspect, no valid objection can be urged against its lawful use, as it is designed to subserve a great humanitary purpose in the reproductive economy. It is impossible in a brief card to give the reader an adequate conception of the virtues of the discovery and the nodus of its action. Accordingly, the proprietors have prepared a pamphlet, fully embodying the phil-sophy of its influence upon the genitive funcion, its uses, tests and results, which they will torward upon the receipt of six cents in postage stamps, to any address. Dr. Aver. Your Pills are the perfection of medicine. They have done my wife more good than I can tell you. She had been sick and plning away for months. Went off to be doctored at great expense, but got no better. She then commenced taking your Pills, which soon cured her, by expelling large quantities of worms (dead) from her body. They afterwards cured her and out two children of thoody dysentery. One of our neighbors had it bad, and my wife cured him with two doses of your Pills, while others around us paid from five to twenty dollars doctors' bills, and lost much time, without being cured entirely seen then. Such a medicine as yours, which is actually good and honest, will be prired here.

AYER'S CHERRY PECTORAL FOR THE RAPID CURE OF COUGHS, COLDS, HOARSENESS, INFLU-

ENZA, BRONCHITIS, WHOOPING COUGH, CROUP, ASTHMA, IN-CIPIENT CONSUMPTION,

COUGH, CROUP, ASTHMA, INCIPIENT CONSUMPTION, and for the relief of consumptive patients in advanced stages of the disease:

We need not speak to the public of its virtues. Throughout every town, and almost every hamlet of the American States, its wonderful cures of pulmonary complaints have made it siready known. Nay, few are the families in any civilized country-on this continent without some personal experience of its effects; and fewer yet the communities any where which have not among them some living trophy of its victory over the mbile and dangerous diseases of the throat and lungs. While it is the most powerful antibote yet known to man for the formidable and dangerous diseases of the pulmonary organs, it is also the pleasunctest and safest reasely that can be employed for infants and young persons. Parents should have it in store against the insidious enemy; that steals upon them unprepared. We have abundant grounds to believe the Cherket Propost assessmeet lives by the consumptions it prevents than those it cures. Keep it by you, and cure your colds while they are carable, nor neglect them until no human skill can master the inexorable canker that, fastened on the vitals, eat your life away. All know the dreading fatality of lung disorders, and as they know too the virtues of this remedy, we need not do more than to assiur them it is still made the best it can be. We spare no cost, no care, no Joil to produce it the most perfect possible, and thus afford those who rely on it the best agent which our skill can furnish for their cure.

Important Discovery. CONSUMPTION, and all diseases of the LUNGS & THROAT are positively curable by INHALATION, which conveys the remedies

to the cavities in the lungs through the air passn ges, and coming in direct contact with the disease neutralizes the tubercular matter, allays the cough causes a free and easy expectoration, heals the lungs, purifies the blood, impurts renewed vitality to the nervous system, giving that energy so indispensable for the restoration of the health. To be able to state confidently that Consumptions is curable by Inhalation, is to me a source of the alloyed pleasure. It is as much under the control of medical treatment as any other formidable disease; 90 out of 100 cases can be cured in the 1st atages, and 50 pr ct. in the 2nd: but in the 3rd stage it is impossible to save more than b pr ct., for the lungs are so cut up by the disease as to bid defiance to medical skill. Even, however, in the last stages, INHALATION affords relief to the suffering attending this fearful scourge, which nnually destroys 95,000 persons in the U.S. alone and a correct calculation shows that of the present population of the earth, 80,000,000 are destined

to fill the consumptive's graves.

Truly the quiver of death has no arrow so fatal as Consumption. In all ages it has been the great enemy of life, for it spaces neither age nor sex, but sweeps off alike the brave the beautiful, graceful and gifted. By the help of the Supreme Being from whom cometh every good and perfect gift, I am enabled to offer to the afflicted permanent and speedy cure in Consumption. The first cause of tubercles is from impure blood and the immediate effect produced by their dep osition in the lungs is to prevent the free admis sion of air into the air cells, which causes a weakened vitality thro' the entire system. Then surey it is more rational to expect greater good from medicines entering the cavities of the lungs than from those administered through the stomach; the patient will always find the lungs free and the breathing easy, after inhaling the remedies. Thus, Inhalation is a local remedy, nevertheless it acts constitutionally, and with more power and certainty than remedies administered through the stomach. To prove the powerful and direct influence of this mode of administration, chloroform inhaled will entirely destroy sensibility in a few minutes, paralyzing the entire nervous sys tem, so that a limb may be amputated without the slightest pain; inhaling the ordinary burning

gas will destroy life in a few hours.

The inhalation of ammonia will arouse the sys em when fainting or apparently dead. The odor of many of the medicines is perceptible in the akin a few minutes after being inhaled, and may be immediately detected in the blood. A convincing proof of the constitutional effects of inhala tion, is the fact that sickness is always produced by breathing foul air-is not this positive evidence that proper remedies, carefully prepared and judiciously administered through the lungs should produce the happiest result? During 18 years practice, many thousands suffering from diseases the lungs and throat, have been under my care and I have effected many remarkable cures, even after the aufferers had been pronounced in the ast stages, which fully satisfies me that Conumption is no longer a fatal disease. My treat nent of Consumption is original, and founded on long experience and a thorough investigation. My perfect acquaintance with the nature of tureles, etc., enables me to distinguish, readily, the various forms of disease that simulate Con umption, and apply the proper remedies, rarely eing mistaken even in a single case. This familiarity, in connection with certain Pathological and microscopic discoveries, enables me to relieve the lungs from the effects of contracted chests, to enlarge the chest, purify the blood, impart to it renewed vitality, giving energy and tone to the

entire system. Medicines with full directions sent to any part of the United States and Canadas, by patients communicating their symytoms by letter. But the cure would be more certain if the patient should pay me a visit, which would give me an opportunity to examine the lungs and enable me to prescribe with much greater certainty, and then the cure could be effected without my see, ing the patient again. SELF ABUSE is another formidable ene
my to health, for nothing elso in the dread cataogue of human diseases causes so destructive a drain upon the system, drawing its thousands of victims through a few years of suffering down to an untimely grave. It destroys the Nervous system, rapidly wastes away the energies of life, causes mental derangement, prevents the proper developement of the system, disqualifies for mar riage, society, business, and all earthly happiness, and leaves the sufferer wrecked in body and mind, Southern Division, a passenger car will be attached to the Express Freight Trains, leaving. more to be dreaded than death itself. I have carefully analyzed many of the so called Patent Medicines and find that nearly all of them contain Corrosive Sublimate, which is one of the strongest preparations of moreory and a deadly oison, which instead of curing disease disables

the system for life.
Three-fourths of the patent nostrums now in use are put up by unprincipled and ignorant persons, who do not understand even the alphabet of the materia medica, and are equally as destitute of any knowledge of the human system, having one object only in view, and that to make money regardless of consequences.
