reason of her disguise, says the Cairo Times, we do not know. Her career as a newsboy has been ended.

THIEVES' IMPLEMENTS.—An account appeared in the London papers some months session of a thief in the metropolis for bor- proved. ing holes into iron pases. Since that time a much more complete instrument of the kind has been found in the possession of a returned convict at Manchester. The instrument found in London could simply drill a small hole through the iron door of a safe; that seized in Manchester cuts out a piece of iron at one operation through which a men's hand 'may be inserted. The invention and workmanship are such as might have turned out only at one of our first rate machine shops. The instrument has been tried by Mesrra Climbb, the iron safe makers, who found that it would cut a piece out of a quarter inch iron door in four hundred revolutions of the lever by which it is worked, or in an hour; and it had cut out a piece from a plate half an inch in thickness without being in the last injured or fendered inefficient for further use. A singular fact in the care is, that in the thief's valise, in which the latter instrument was found, was also discovered a cogwheel belonging to the instrument seized in London, connecting the person having the one machine with the owner of the other. The person in whose possession the machine was found in Manchester escaped punishment because he was in a dwelling house with it when taken; had he aurveyed in the warrantee name of Peter Snyder, been taken with it in the wireefs he could have N. 46 E. 147 perches to the place of beginning, been reached by thelaw.

ACKNOWI.EDGMENT.

Mr. and Mrs. HENRY A. RILEY tender their Taken in execution at the suits of Julius S. most grateful acknowledgment to their friends Corbett, Southworth, Slauson & Co., and J. THE Bowels and their functions. As perfect health is the greatest blessing that we can enjoy, without which all other blessings are of little consequence, we deem it of great importance to point out the way for you to enjoy it.—
The bowels must be kept in a tinte by which they are enabled to carry off everything that is unnecessary. And it is impossible to tell what a large amount of sickness has been caused by onstipation, or costiveness, in other words, by tond to all diseases; the cause of unnatural irritation to the mucrous, or libing membranes of the bowels. Having lost their natural strength, they cannot object to what is required of them. Hence the bowels become inflamed, and ubless you find speedy relief, a thousand other complaints are ever ready to drag you through a miserable and wretched life. Such medicines must be given as will cleaned the stomach and bowels, and re-
