The Tariff."

merely, for the reason that the Constitution and drive away the white settlers. They Denmore, M of the United States only gives Congress-the have destroyed the village of Medary and power to raise revenue for the purpose of car-rying on the government, and there is not train near Medary was also plundered. one word, by implication or otherwise, about

the people being taxed for the sole purpose of protecting this of that interest. Revenue is tions. the object for which duties are laid, and if any protection can be given, incidental to this, and without raising more money off the people than the expenses of the government require, it would be right and proper to discriminate in favor of our own artizans, and afford them such protection. We believe that free trade is the true doctrine, and we never could see. why any more restrictions should be placed House No. 2 on Monday, July 5th, the following npon our people going to Europe to trade, than over into New Jersey. But in the present condition of the world it is impossible to inaugurate a free trade system. for while other nations tax our goods, we must tax theirs. There is no more reason to tax the goods a vessel carries, than to tax the vessel itself; and England and other natious have long since relinquished tonnage duties; -

If the present tariff will not raise revenue enough to meet the wants of the government, then we are in favor of increasing it. The isriff of 1846 yielded ample revenue for all purposes, and all interests prospered under it. and we are in favor of restoring it, until it shall lie found that lower rates will suffice. The tariff is more a question of political economy, than one of politics; and our rerenne laws will never be stable, but always fluctuating, so long as they are dragged into to sell-one near S. T. Scott's, and the other all our party squabbles. The manufacturer near George Frink's. THOMAS JOHNSON, does not so much need high duties, as stabil-

ity in the rates, that he may always know what 19 depend upon and govern himself accordingly.

Corree.-Boiled coffee, it is well known, is superior to coffee made after the French fashion, by straining; but, when boiled in an ordinary coffee pot, the fine aroma goes off with the vapor, leaving the infusion flat or bitter, hence the resort by many housekeer-ers to the French biggin. Recently, there has been patented a new coffee pot, which entire-1st Sunday. Iv removes the common objection of waste of strength and flavor by evaporation in boiling. It is called the 'Old Dominion Coffee Pot,' and is made with a condenser at the top, in which two syphons are arranged. After the coffee and water are placed in the coffee pot. the condenser, containing a small portion of cold water, is fut on, and the spout closed with a movable cap, so that not a particle if vapor can escape. As soon as the coffee begins to boil, the wapor, instead of being given off into the room, passes up one of the syphons, and is condensed by the cold water, into which as much of the aroma as was equally firm reliance on the Pills. What, then. carried off with the vapor, is discharged. As the coffee continues to boil; the vapor, loaded with the aroma continues to pass through the the other? In order to be sure you have the sruhon into the water held in the Condenser. until the water is raised above the level of the other suplion, when the whole passes back.

ly suction, into the coffee below. Thus the coffee is boiled, and yet does not lose a parts. itles of its fine aroma or strength. Several attempts have been made to construct a coffee pot that would accomplish this desirable object, but, until the Old Domion Coffee Pot' appeared; none wis found entirely adapted to the purpose. It seems Montrose, Pa. to be as near perfection as can at p e ent b attained. It is simple in construction, easily mal School .- Thorewho will furnish board hailing. There are in coffee both an aromatic and a bitter principle. In boiling, the atomatic (which is very volatile) escapes if the boiler is open, and the bitter remains. The excellence of coffee, depends on the amount of atoma retained in boiling ; but all know that this delicious fragrance of the berry is allowed to pervade the whole house for half-anerjoyment is found in the drinking. Coffee thus deprived of its aroma, is neither so pleasaut to the taste, nor so healthy as a beverage. We would recommend to housekeepers : trial of the Old Dominion Coffee Pot, which some families have had in use for over a year, and say they would on no consideration be without it has it retains the whole of the strength, as well as the aroma of the berry. One fourth less coffee is required ; and this is a consideration in these times.-Lady's Home Magazine.

Indian Depredations in Dacotab. T IST OF LETTERS remiting in the Post The Tarin. We notice that the hobby-riding politicans of the day are trying to re-mount the tariff question. Of such we would ask a perusal of a few remarks, which we clip from the Doylestown Democral: We notice that the tariff for protection of a few remarks, which we clip from the Doylestown Democral: We notice that the tariff for protection We notice the tariff for protection We not the tariff for pro "We are opposed to the tariff for protection | Government, they intend to recover the hands. | Davey, Peter France, J.
