HAMMONTON LANDS.

NEW ENGLAND SETTLEMENT. RARE opportunity to all wanting farms—in a healthy place, twenty-five miles from Philadelphia, on the Camden and Atlantic railroad. New Jersey. An old estate has recently been opened for sale, and the first division of 10,000 acres divided up into farms of twenty acres and upwards. The soil is of the best quality for the production of fruits, grains, &c. The price is \$15 to \$20 per acre, payable in easy quarter yearly instalments, within a term of four years. with interest. The terms are made easy, in order to insure the rapid improvement of the land, by enabling every industrious man to buy a farm. It is now being extensively improved by good roads, and some of the best citizens from New England and the Middle States are erecting large improvements. It is a scene of the greatest improvement out of Philadelphia. Seventy-five houses have been built in four months. Practical furmers and business men from the length and breadth of the Union are settling there. It is a timportant business place, on account of its loing in the midst of a great market. Every article raised upon this land finds an immediate sale.

The soil is a sandy of clay loam, with a clay bottom and retentive of manures. It is free of stones and easily worked. It abounds largely in the phosphates, and such is its fertility that from the crops produced both upon this land and the large area adjoining under cultivation, it will be found not to be excelled anywhere in the production of crops most adapted to its mar-

The reader may be well aware that the earliest and the best fruits and vegetables come from New Jersey, which are annually exported to the amount of millions of dollars. The land, besides heing accessible in every way for fertilizers, has an abundant supply of the best quality of muck

Lumber and building materials can be had on the spot at a cheap price, from the mills. Other mills are now being opened, and brickyards being started upon the ground. A person can put up a frame tenement for present convenience for one hundred dollars. On account of the extensive emigration, this is the best course to pursue in order to get a place to live in at first. Car penters and builders are on hand to put up hous-

land: he is near his old friends and associations; he is in a settled country, where every improve ment and comfort of civilization is at hand; -he is in a healthy place, and is not subject to the certainty of losing the greater part of his family and his own health by those malignant fevers which make the graves of so many millions of the young and hardy in far off regions away from home and friends. Besides, he has a mild

climate and an open winter.

There are three trains daily to Philadelphla, and to those who improve the railroad company gives a free ticket.

The reader will at once be struck with the advantages here presented, and ask himself why the property has not been taken up before. reason is, it was never thrown in the market: and unless these statements were correct. no ore would be invited to examine the land be fore purchasing. This all are expected to do.— They will see the land under cultivation; they will meet persons, no doubt, from their own neighborhood; they will witness the improvements, and can judge of the character of the population. Persons should come prepared to purchase, as many are locating, and locations are
