MIRACLES NEVER CEASE!

THE LATEST PRODIGY OF SCIENCE. Great truths are indistructible! When Jenner avered that vaccine innoculation was a safeguard against the small pox, the "faculty" speered. Forty-five years later, the world laughed at Dagurre's first announcement that he could fix a shadow and render it as impershable, as substance. Even Morse's tele graph was regarded by thousands as a myth, until the first line was put up in 1844. Now vaccination is universal, daguerreotypes are as common as wood cuts, and we talk by telegraph with almost as much facility as across

friend's table. Such is necessarily the progress of a grand discovery or invention in an age like ours and of this irresistable onward movement of the useful and benificent in practical science, we have a still more striking example in the world-wide popularity of Holloway's great remedies. If we mistake not, they are scarcely older as an incention than the photograph and the electric telegraph, and yet they are familiar to half the human race. The discoveries of Daguerre and Morse have not been applied throughout the whole era of civilization; but barbarian and semi-barbarian races, upon whom the light of Christainity has not yet dawned, have experienced the benefits of these

preparations. When they were first introduced to public notice through the columns of the English press, about twenty years ago, some of the medical magnates of the day scoffed at them, as their prototypes of the days of Jenner and Harvey scoffed at vaccination and the theory of the circulation of the blood. But how i it now! The name of Holloway has been rendered illustrious by the spontaneous testimony of countless multitudes. The voice of skepticism has been husbed, and the specious arguments of professional dogmatists con-founded, by the introduction of his Pills and Ointment into the medical institutions of the most enlightened nations.

There may possibly be here and there a dogged disciplinarian of the old school, who wont see what is patent to the whole worldsome fossile specimen of a bygone age of medical bigotry, who closes his ears to the great fact that Holloway's vegetable remedies are displacing and superseding the mineral poisons, once considered all in all; but such instances of confirmed and hopeless "old fogyism" are fortunately few and far between. They will probably be remembered when Holloway is forgotten—and not till then.— N. V. "Nat. Pol. Gazette."

The following correspondence is said to have taken place between a New Haven merchant and one of his customers: "Sir-Your account has been standing

for over two years, I must have it settled im mediately.' To which in reply-

*Sir-Things usually do settle by standing; I regret that my account is an exception. If it has been standing too long, suppose you let -it run a little while"

PRETTY GOOD. - At the Fourth of July celebration, held at Lexington, the following toast was offered: "Hoops and Tight Pants -the unqualified representatives of financial extremes. May the charms of the ladies be as boundless as their skirts; and may the gents never get as thight as their breeches."

The post office clerks in Prussia are obliged to wear uniform in the streets, and that government now intends to impose the same uniform on the employes of railways. and telegraphe. To distinguish, however, these three classes of functionaries, those of the post office are to have on their caps a wooled. horn, those of railways a wheel, and those Judg of the telegraph an arror.

"You have lost your baby, I hear said one gentleman to another. "Yes, poor little thing! it was only five

months old. We did all we could for it . We had four doctors, blistered it, head and feet put mustard poultices all over it and gave it nine calomel powders, leeched its temples, had it bled, and gave it all kinds of medicines, and yet after a week's illness it died."

Great Discovery of the Age.

IMPORTANT TO TOBACCO CHEWERS. DR. GUSTAV LINNARD'S Taste Restor-ative Troches,—The Great Substitute for Tobacco. It is a well known and incontroverti ble fact that the use of tobacco is the promoting

to which the race of man is subject, as careful analysis and long and painful experience have clearly proven that it contains certain narcotic & poisonous properties most dangerous in their effects, which by entering the blood derange the functions and operations of the heart, causing many to suppose that organ to be diseased.

TOBACCO affects also the entire nervous

system, manifesting itself—as all who have ever used the weed will testify—in lassitude, nervous irratibility, water brash, dyspepsia, and many other disorders of a similar character. The TASTE RESTORATIVE TROCHES are designed to counteract these baneful influences, and have proved completely successful in a multitude of cases, and wherever used. Being harmless in themselves they exert a beneficial effect upon the entire system, restoring the taste which has become vitiated or destroyed by great indulgence, completely removing the irritation and accompanying tickling sensation of the throat —which are always consequent upon abstaining from the use of tobacco, and by giving a healthy tone to the stomach, invigorate the whole system. Persons who are irretrievably undermining their constitutions and shortening their lives, should use these troches immediately and throw off the injurious & unpleasant habit of chewing tobacco.

These troches or lozenges are put up in a convenient and portable form at the low price of 50 cents per box. A liberal discount to the trade.

Prepared solely by the undersigned to whom

Some kind friend may say that it will be "RO GO," but we think from the experience of the past few months of every person who hap peried to owe the country merchants, especially if it had been standing six months or more, with what coaxing, dunning threats, &c., they have been beset, we think they will all respond to the above system and resolve to buy no more goods than they can pay for, and that they are letermined to support those who will establish that principle and carry it out. We will let the system established stand upon its own merits, believing that it is the most prudent and wise course to be pursued in every branch of business, and that the day is not far distant when it will be GENERALLY adopted.
