EAR AND EYE.

Deafness, Total or Partial Entirely Removed! R. H. ENWOOD, begs to call the attention of those suffering under a partial or total loss of the sense of hearing to the following facts: He treats diseases of the middle and internal ear with medicated douches, such as is practised in the Infirmaries of Berlin, Leipsic, Brussels, and St. Petersburg; and lately by the most distin.

Beldwin, Elieza C. Brown, M. J. guished London Aurists, with the most wonderfal success; indeed, it is the only method that Card, S. H. & Co. has been universally successful.

The best proof of the efficacy of this treatment will be a reference to nearly nine hundred names, residents of the United States, Canada, Naw Brunswick and Nova Scotia, who have been restored to acute hearing, and not a single solitary case, to our knowledge, did we fail to effect either a partial or total restoration of the hearing when our advice and instructions were faithfully adheared to. Many who could not hear the report of a pistol at arm's length, can now hear a watch beat at the distance of four feet. In the case of mucus accumulation to the Eustachian Tube and Tympan, inflammention of the mucus membrane, nervous affections, diseases of the membrana tympani, called "the drnm," or when the disease can be traced to the effects of fevers or colds, the use of quinice or mercurial medicines, gatherings in the ears in childhood, &c., this treatment stands pre-eminent. When the auditory canal is dry and scaly, with little or no necrotion; when the deafness is accompanied by noise in the ear, like falling water, chieping of insects, ringing of bells, rustling of leaves, continual pulsations, a discharge of matter; or when in stopping a sensation is felt as if a rush of blood to the head had taken place, when the bearing is less acute in dall clouds weather, or when cold has been taken, this method of treat- at the well know establishment formerly occuwhen cold has ocen tract, this network that ing the disease is infallible. CONSUMPTION. A New and Important Discovery in its Treatment,

TN which the use of Hypophospites of Lime, &c., have been found to be most efficacious, almost surpassing belief. Inhalation in Consumption. Bronchitis, Laryngitia, and other diseases of the Chest and Throat, successfully treated by the

inhalation of Medicated Vapors and Powders by absorption and constitutional treatment. The unprecedented success which has attended this method of treating diseases of the Lungs and Throat, has induced the physician's to depart the columns of the press to make it known to such as may be laboring under; or predisposed to, such affections. The dawning of a brighter day has at lenth arrived for the consumptive; the doctrine of the incurability of consumption has now passed away. We have industable proof in our possession, that consumption in all its caler absorption; in the second, by the transformation of tubercule into chalky and calcerous coccetions; in the third, by cicatraces or scars. Those wedded to the opinions of the past may a secrt that it is even now incurable; such are behind the age. To all persons, then, this great truth must be apparent; viz: that medicines inhaled directly into the lungs, whether in the form of vapor or powder, must be more effectual than that taken into the stomach. In short, the only ark of refuge for the consumptive, is intalation, and such additional means, of which the

judicious physician will avail himself. Such of the profession as have adopted inha-lation have found it soothing and efficacious in the highest degree; arresting the progress of

the diseases, and working wonders in many desperate cases; in verity a triumph of our art over this fell destroyer of our species.

Note.—Physicians wishing to make them selves acquainted with this practice, are informed that our time being valuable, we can only reply, as to the ingredients used, to such letters as
