The Bucks County Intelligence unl retands that it is the intention of the Delaware Division Canal Company, after the canal is put in complete, repair, to allow the water to temain in it all Winter. Their motion is that it would be less liable to injury from freshets or from washing in of loose earth when full, than empty. At least they are disposed to try the experiment.

Soft the accommodation of those who have patronized me heretofore I will say that I will be with my books, bills, and accounts at the following named places for full settlement of the same, not that I wish to hurry payment, but that we may settle and pay when you can we will take outs, and in fact, most every kind Delaware Division Canal Company, after the are disposed to try the experiment.

Hollowny's Pills .- Almost every juvention has its enemies. We have heard locomotion has its enemies. We have heard focum-tives denounced, and the magnetic tolegraph called a nuisance. The world, however, seems to have agreed nem. con in relation to this great cosmop litan remedy. There is nothing surprising in this. The human race everywhere have the same internal organization—their tomachs, livers, circulation nerves, all their vital organs, are a prey to countless diseases, and all these diseases are controlled and cured by Holloway's Pills. This, in substance, is the sestimony of the Old World. It has been echoed and emphasized in this country. No man contradicts it. The inference is irresistable—it is

NEW DOG POWER,

A GREAT INVENTION Patented June 15th, 1858 by-A. G. BRUSH, Great Bend, Pa. WE recommend this POWER to all those who have Charles Who have Churning to do, as being em-inently adapted to their wants. It is simple and efficient, requiring less weight to operate it than any other power used for a similar purpose. It

Its construction is so perfectly adapted to the work it has to do, that it is impossible to get it out of At the Susquehanna County Agricultural Fair, held at Montrose, Sept. 30th, 1858, it appears from the following report of the Committee on Farm Implements Addison G. "They have been much pleased in the examination of Addison Brush's newly invented Dog Power for Churning; combining, as they believe, more power with less friction, at less expense than any machine that has yet come under their observation. The ease with which it can be constructed or repaired, and the power indefinitely increased, is a recommendation that cannot be extended to the endless chain or roller—its simplicity is truly a remarkable feature, and a dairyman has only to acquire the ordinary ability to use a saw, to make a mortice and tenon, and he has one of these machines within himself. When wife is relieved by these achievements of skill and genius, they cannot avoid feeling grateful for every effort that may be made for such a desirable result. They award him the premium of 82" CALEB CARMALT, Committee.

Any one wishing to purchase town or county, or individual right, can now be accommodated. We invite those who are interested in improving and cheapening farm implements to give us a call and examine our Dog Power. We offer such inducements that those who engage in this usiness are not only sure to make money themselves, but prove a biessing to every one who has churning to do whom they furnish with one of these time and labor saving Powers.
