Auburn, Jan. 20th, 1859 .- w 6.4 NEW DOD POWER.

A GREAT INVENTION Patented June 15th, 1858 by A. G. BRUSH, Great Bend, Pa.

WE recommend this POWER to all those who have Churning to do, as being eminently adapted to their wants. It is simple and efficient, requiring less weight to operate it than any other power used for a similar purpose. It is cheap, and at the scine time permanent. Its construction is so perfectly adapted to the work it has to do, that it is impossible to get it out of order.

order. At the Susquehanna County Agricultural Fair, held at Montrose_k Sept. 30th, 1833, it inppears from the following report of the Committee on Parm Implements Addison G. Brush's Dog Pow. er took the rikst premium. Here is what the

Committee says:

'They have been much pleased in the examination of Addison Brush's newly invented Dog Power for Churning; combining, as they believe, more power with less friction, at less expense that has yet come under their more power with less triction, at less expense than any machine that has yet come under their observation. The ease with which it can be constructed or sepaired, and the power indefinitely increased, is a recommendation that cannot be extended to the endless chain or roller—its sim-plicity is truly a remarkable feature, and a dairyman has only to acquire the ordinary ability to use a saw, to make a mortice and tenon, and he has one of these muchines within himself. When has one of these michines within himself. When we consider the drudgery from which a farmer's wife is relieved by these achievements of skill and genius, they cannot avoid feeling grateful for every effort that may be made for such a desirable result. They award him the premium of \$2" CALEB CARMALT.

ABEL CASSIDY, Committee.

The above indorsement is a sufficient guarantee that this invention is not one of those worthless patents which have gulled the people so ex-tensively.

tensively.

Any one wishing to purchase town or county, or individual right, can now be accommodated. We invite those who are interested in improving and cheapening farm implements to give us a call and examine our Dog Power. We offer such inducements that those who are independent of the same, not that it wish to hurry payment; but that we may settle and pay when you can. We will take oats, and in fact, most overy kind of produce—so, gents, if you have anything to such inducements that those who engage in this business are notionly sure to make money them. such moderments that those who engage in the business are not only sure to make money themselves, but prove a biessing to every one who has chuming to do whom they furnish with one of these time and labor saving Powers.
