GOOD NEWS AT LAST Pike's Peak, THE MONTROSE DEMOCRAT. Scrofula, or King's Evil, SCroilula, or king's Livil, is a constitutional disease, a corruption of the blood, by which this fluid becomes vitiated, weak, and poor. Being in the circulation, its pervades the whole body, and may burst out in disease on any part of it. No organ is free from its attacks, nor is there one which it may not destroy. The scrofulous taint is variously caused by mercurial disease, low living, dis-ordered or unhealthy food, impure air, filth and filthy habits, the depressing vices, and, above all, by the venercal infection. What-ever be its origin, it is hereditary in the con-stitution, descending "from parents to children int othe third and fourth generation," indeed, it seems to be the rod of Him who says, "I will visit the inquities of the fathers upon their children." Sweetened We met this tale on its rounds. We are not sure we have seen it before. But it will bear repetition if it is old. This foul cor-ruption, which genders in the blood, depresses the energies of life, so that scrofulous constitu-tions not only suffer from scrofulous com-plaints, but they have far less power to with-stand the attacks of other diseases; conse-quently, vast numbers perish by disorders which, although not scrofulous in their nature, are still rendered fatal by thist thint in the system. Most of the consumption which de-cimates the human family has its origin directly in this scrofulous contamination; and many destructive diseases of the liver, kidneys, brain, and, indeed, of all the organs, arise from or are aggravated by the same cause. One quarter of all our people are scrofulous; their persons are invaded by this lurking in-fection, and their health is undermined by it. Feats of Agility. The natives of China and Hudostan must be allowed to surpass all the rest of the world in feats of agility and ledgerdemain. The Euglish public have of late years had an opportunity of witnessing exhibitions by Jugglers from both contries; but surprising as some of their performances were, they are far surpased by what is everyday to be seen in India. Two men will throw spears at each other at about fifteen fect dis an', as forcibly as they can; one will ward off his adversary's dart by another, which he carries upright in both hands and the other receives his opponent's javelin every throw, under one of his arms Four p'rsons will hold slightly a linen cloth stretched out; a man will run over it so light-ly, as not to force it out of the holder's hands. Two sabres being placed parallel upon the ground, with their edges upwards, a man will run once over their edges so lightly as not to cut himself. The same man will step over upon the point of a sword fixed upright, and then jump through a barrel, held horizontally, about five feet high. A sword and four daggers are placed upon

the ground, the edges and points upwards, no further distance from each other than will admit of a man's head; a man then fixes a cimeter upright, sits down behind it, and at a bound, throws Limself over the cimeter, pitches his head exactly in the space between the daggers, and turns over, clear of them. A common rope is stretched upon two pair of crossed spars, about twenty feet distant and fourteen feet from the ground. A man piles six watter-pots upon his head, and, thus ac-coutred, ascends the rope by means of the spars, or of a sloping cord on the outside of them; the rope is not quite tight, but left with a slack of about three feet; he then, with a balance pole in his hand, walks backward and surged and surged the rope of the state of th of crossed spars, about twenty feet distant and and forward, and swings the rope to its extent without letting a single pot fall, Five earthen pots are placed above each other on a man's head. A young girl mounts upon the uppermost, and the man then dan ces about with the pots and girl thus balanced A man will take a bress pan, and twirl it round upon the end of a short pointed stick, then tosi it so high in the air, catch it again in any part upon the point of the stick, still continuing to twirl it round; he will then tie another stick to the first, and a third to the second, each tie forming a kind of circular then the baltom stick mon his hinge; then rest the bottom stick upon his pese or chin, each stick moving round its joint, and the pan still twirling round upon its cen tre, on the top of all, the whole keeping in ,equilibrium. A cap with a broad s iff sim is fitted to a man's head, to which is tied about twenty strings, terminated each by small nooses. In his left hand he holds a small basket, or brass pan, containing trenty regs; then turning roand, with a quick but regular motion, (as the Turkish dervised are represented to do in religions rites,) he fastens, successively, with his right hand, an egg into each of the nooses, still turning round. When they are all fastened, he accelerates his rotation, till the eggs circulate swiftly as the flier of a jack. After this he rather slackens his motion, unties the eggs one by one, returns them into the basket, and slops; the strings measure f om three to fourfeet, and are of unequal leangths, let the and, in fact, almost anything in their line, by callthis he rather slackens his motion, unties the eggs should accidentally clash. A man will place upon his head two pieces of wood, like double-headed shot, each a foot CHI in length, one over the other; upon the highest piece he adds a brass dish; upon the dish four wooden pillars, each about fite inches in height; upon the pillars a small plank; upon the plank stands a girl upright. With all this apparatus in due balance, he will dance three or four times round the room. Another will place a straw on' his nose in the open air, balance it first there, and then

READY-MADE CLOTHING! We have just opened about one and a halt cords of ready-made clothing. Every body says they are cheap. Some say they are very cheap, and a number have ventured to say they are dog cheap. Certain it is that a small pile of money will buy a large pile of clothing. We would add, in this connection, for the in-

formation of all concerned and the "rest of man-kind," that we are tired and sick of the credit system; we have suffered enough by it already. and are determined to rid ourselves of the the whole "critter." Believing that the nimble sixpence is the true system; we are resolved to adopt it, and are offering our goods at prices to

A Benevolent Institution, established by special en dowment for the relief of the sick and distressed, afflicted with-Virulent and Epidemic diseases. THE HOWARD ASSOCIATION, in view of the awful destruction of human life, caused by Sezual diseases, and the deceptions practised upon the unfortunate victims of such diseases his Quacks, several years ago directed their Con ulting Surgeon, as a CHARITABLE ACT worthy of their name, to open a Dispensary for the treat-ment of this class of diseases, in all their forms, and to give MEDICAL ADVICE GRATIS, to all who apply by letter, with a description of their con-dition, (age, occupation, habits of life, &c.,) and in cases of extreme poverty, to furnish medicines free of charge. It is needless to add that the Association commands the highest medical skill of the age, and will furnish the most improved

modern treatment. The Directors of the Association, in their Annual Report upon the treatment of Sexual Dischees, for the year ending January 1st, 1853, express the highest satisfaction with the success which has attended the labors of the Consulting Surgeon in the cure of Spermatorrhea, Seminal Weakness, Impotence, Gonorrhea, Gleet, Sypillis, the vice of Onanism'or Self-abuse, &c., and or-der a continuance of the same plan for the en-suing year.
