Just Published. NEW METHOD FOR THE PIANO FORTE. BY CHARLES GROBE.

Opus 1100. Price, \$2 50 nett.-Bound in Cloth, \$3 00 nett.

GOOD instruction book for the Piano has A been long wanting, and Mr Chas. Gnone.
has performed the labor, in getting this one up
in a most admirable and satisfactory manner. It will prove itself to be one of the most valuable guides in the instruction of the art of playing the Piano.

Considering the author's well known capacity and long and unremitting devotion to the task of elementary teaching, we have strong reason to hope that the public are now to be farnished

with a thorough, systematic, progressive, and entertaining method for the Piano. We can confidently recommend it to teachers and pupils as better adapted to the purposes of elementary instruction than any others with

which we are acquainted.

The plan pursued in this work is substantially the same as that developed in Ollendorff's meth-ed of teaching languages. It commences with the simplest elements. The progress made will be gradual, so that every step will be perfectly intelligible, and be rendered of positive value to

the pupil. Every difficulty is met with singly, and after thorough analysis, overcome by practice. This method will, endoubtedly, provide teachers with a well-digested, progressive, and enterthining plan by which a sound and correct knowledge of the art of playing the Piano may be acquired with comparatively little labor, and in so hort a space of time as will almost seem incred se who have confined themselves to some of the tedious systems heretofore in use. This work contains ten engraved figures, illus-

trating the different positions of the hands and listypographical accoracy and appearance have never been equalled in any musical work that has heretofore been issued from the press in this or any other country.

Copies will be sent by mail, free of postage

en receipt of the marked price.
