Francis Churchill, M. D. THE THEORY.

"Phthisis is a diathesis, or general disease, depending upon the want or undue waste of the Oxydizable Phosphorus normally existing in the animal economy.

THE FREATMENT. "Hence it follows that the Remedy, consists in supplying the deficient element by the administration of a preparation of phosphorus which is at once Assimilable and Oxydizable. The Hy-pophosphites of Lime and Soda possess both qualities in the highest degree, being perfectly

soluble, and nearly as oxydizable as phosphoru The Hypophosphites are the Specific Remedy of the Diathesis, or general condition of the system, which haz, as a consequence, the deposition of tubercular matter. When once this condition is changed, the deposition of fresh tubercular matter will come matter will cease.

RESULTS OF THE TREATMENT: What I am anxious for is, that the Hypophos what I am anxious for is, that the Hypophos-phites should be brought as speedily as possible into universal use as I know that they will prove not only as sure a Remedy in Consumption as Quinne is in Intermittent fever, but also as effectual a Preservative as Enceination in Small-pox. This assertion no longer rests upon the 34 cases This assertion no longer rests upon the 34 cases with which my discovery was unkered into the world in July, 1857. I can now appeal to the results in upwards of one hundred and fifty detailed observations of the discase, collected during the past year at my Public Dispensary, Rue Larrey, Paris. To these cases might be added almost an equal number from my private practice and in no single instance have I found the Remede fail to produce ever thing that and research. ede fail to produce everything that could reasonably be expected from it. In most instances the benefit derived from it has far exceeded what could, at first, have been hoped for, when taking

Similar results have, since the publication of my discovery, been announced by Professors Paragot of Brussels, Masstra, de San Juan of Granada, Spain, Drs. Lacinto Le Riversen and Gaivez of Havana, and Reinvillius, Paris.
