NOTICE.

DR. E. PATRICK, JR., would like after a sickness of nearly ten years, to appeal to the moral sensibilities of a very generous public, who have always manifested their sense of appreciation of his usefulness by exacting his services when needed or thought to be needed, but who have given no other evidence of gratitude or good will—particularly in the way of "substantial aid" as Kossuth would say—that he now desires a full and entire settlement of all his accounts, also the accounts of the late firm of Patrick & Dimock; and he wishes further to state that he desires nothing to be considered *wrong*, if, after a few weeks, the said accounts, remaining unsettled, shall be placed in the hands of a good *sharp collector*, and made to account to him something that will buy Oats and Buckwheat. Please notice this and take action accordingly.—Yours Truly.

Scrofula, or King's Evil,

is a constitutional disease, a corruption of the blood, by which this fluid becomes vitiated, weak, and poor. Being in the circulation, it pervades the whole body, and may burst out in disease on any part of it. No organ is free from its attacks, nor is there one which it may not destroy. The scrofulous taint is variously caused by mercurial disease, low living, disordered or unhealthy food, impure air, filth and filthy habits, the depressing vices, and, above all, by the venereal infection. Whatever be its origin, it is hereditary in the constitution, descending "from parents to children unto the third and fourth generation;" indeed, it seems to be the rod of Him who says, "I will visit the iniquities of the fathers upon their children."

Its effects commence by deposition from the blood of corrupt or ulcerous matter, which, in the lungs, liver, and internal organs, is termed tubercles; in the glands, swellings; and on the surface, eruptions or sores. This foul corruption, which genders in the blood, depresses the energies of life, so that scrofulous constitutions not only suffer from scrofulous complaints, but they have far less power to withstand the attacks of other diseases; consequently, vast numbers perish by disorders which, although not scrofulous in their n
