a Congressional slave code for the Territories. Resolved. That in the two years amendment to the Mass. State Constitution, under which naturalized citizens are cut off from the exercise of the elective franchise for two years after they have complied with all the conditions of citizenship, we recognize in the self-styled "Republican" party the proscrip-tive spirit of undisguised Know-Nothingism, and we denounce this attempt to degrade the foreign white man below the level of the negro, by giving him the right of suffrage and office in one year, and withholding the same

GENUINE PREPARATION OF THE

HYPOPHOSPHITES

Francis Churchill, M. D. THE THEORY. "Phthisis is a diathesis, or general disease, depending upon the want or undue waste of the Oxydizable Phosphorus normally existing in the

nimal economy."
THE TREATMENT. "Hence it follows that the Remedy consists in supplying the deficient element by the administration of a preparation of phosphorus which is at once Assimilable and Oxydizable. The Hypophosphites of Lime and Soda possess both qualities in the highest degree, being perfectly Soluble, and nearly as oxydizable as phosphorus

of the Diathesis, or general condition of the system, which has, as a consequence, the deposition of tubercular matter. When once this condition is changed, the deposition of fresh tubercula matter will cease.

RESULTS OF THE TREATMENT. What I am anxious for is, that the Hypopho phites should be brought as speedily as possible into universal use as I know that they will prove not only as sure a Remedy in Consumption as Bridgeville. Quinine is in Intermittent fever, but also as effec tuni a Preservative as Vaccination in Small-pox. This assertion no longer rests upon the 34 cases with which my discovery was ushered into the world in July, 1857. I can now appeal to the results in upwards of one hundred and fifty detailed observations of the discuss, collected during the post year at my Public Dispensary, Rue Larrey, Paris. Similar results have, since the publication of my discovery, been announced by Professors Paragot of Brassols, Masstre de San Juan of Gransda, Spain; Drs. Jacinto Le Riverend and Galvez of Havana, and Reinvillis, Paris. Of 23 cases in the third or last stage, treated at my Dispensary during the past year, 8 have completely recovered, 8 died, (owing in every instance to complications,) and 6 are still under instance to complications,) and 6 are still under
