vious, dark, winding way, it was done with murderous deliberation. Who furnished the pikes to be placed in the hands of infuriated blacks at midnight, to murder their masters apaced;) 4; South Americans (small and mistresses! Who furnished the arms capitals,) 23.] and munitions and sped them on their way to inaugurate this irrepressible conflict? These questions will have to be answered to the satisfaction of the American people. Attilla the Hun, who was denominated the scourge of God, by reason of his black and brutal ferocity, declared that no green grass should ever grow where his horse's feet had trodden. Hyder Ali upon the Carnatic left nothing behind his trail but ashes and blood. But Attils the Hun and Hyder Ali upon the Carnatic will be regarded in the great day honester men in the sight of God and man than those that inaugurated that irrepressible conflict in Virginia. It is no light thing, no matter for a mere nine day's wonder, that the people of Harper's Ferry, in one of the States of this confederacy of peaceful States, find themselves suddenly assailed by desperadors, and that State slumbering upon a volcano. The State that furnished a Commander in-Chief for the Revolution, the mother of Pres idents, one of the oldest and most faithful, one that has discharged all her obligations one that had fought side by side with the Empire State, has been invaded. Stealthily, murderously has the irrepressible conflict een preparing. Arms and munitions of war taken there to be placed in the hands of slaves, that arson, murder and rape may be committed. This matter had been going on for years, and eminent men were connected with it. It no sudden act of a frenzied brain, but was known to men throughout the free States. If Brown was a madman why was he not denounced! The secret was well kept till the storm burst, blood was shed and women and children ran shricking for protection. Then the bloody pike was brandished, fatal aim was taken upon the rifle and the irrepressible conflict was ushered in, not in theoty-only, but in terrible practice. I think that the State of Virginia has acted with sufficient deliberation. There seems to have been a fair and deliberate trial. I have had great sympathy for the individual sufferers, but the majesty of the law must be vindicated. How should we have acted if a band of Virginians, dissatisfied with our banking, or some other institutions, had made a similar descent upon us! It is about time to pause and reflect. The American people are now called upon to decide who they will serve-whether they Will support the constitution in its letter and spirit, or permit this demon of destruction to stalk up and down the land. To what end and for what good purpose has this controversy been raised. If slavery was an evil to be warred against why did these States ever enter into a compact? And if New York or. her citizens were going to be imbued with such a wonderful spirit of liberty why was it not manifested long ago? No! all at once the necessities of a political party have demanded that the slavery question should be pressed into their service simply because everything else has been worn out and run into the ground. (Applause.) Look at this oppo-sition party. They have called themselves all manner of names, taking a name and wearing it out like an old worn out garment. The old whig name, full of honored memories, lasted longer than any other, ' Now re publican has been brought into service, new ly whitewashed, and if it lasts them through the next election they will never try it on again. (Applause.) Opposition is a suitable name-opposition to the constitution, opposition to the best interests of the country, opposition to the sound financial system, opposition to good faith and good feeling between the several States. They have opposed every democratic measure, the purchase of Louisiana, the war of 1812, the reneal of a high tariff. Had their counsels prevailed the Union would now have comprised only the old thirteen States and their Territories; and yet cramped as it would have been, it would be too large for this party, for it would have included Georgia, the Carolinas, Tennessee, Kentucky, Virginia, Maryland and Delaware. in which there is no republican party. (Applause.) The republican jacket wo been too small for that cramped nation. (Cheers and laughter.) How, I would like to know, do the republican party propose to exercise the government when they have no local habitation nor a name, and when this great irrepressible army of freedom can never 11. on Monday evening, characterized, as usual, by a gross, disregard, of courtesy, decency, and truth; alleging among other absurd falsehoods, that the Demooratic party were engaged in carrying on the foreign slave tradeand were pledged to acquire slave territory from other countries, by robbery and theft .-He was careful to not give a very direct opinion of Brown : but called him crazy, etc., and attempted to set up a full justification of his acts, by rehearsing Kansas yarns. Had he stated the truth of Brown's Kansas career, he would have shown that (as he went to Kansas solely to fight, and not to settle, and that when there he became a 'cold blooded murderer before harm ever came to him or bis) the late affair was but a continuance of his bloody schemes, in which he has always been backed op by Republican arms and money, from Aid Societies and other sources. We think that an unequivocal opinion would have been more satisfactory to all; but when he spoke of Brown as an "Avenging Angel," and justified, his bloody acts at great length, he left the impression upon his bearers that he had not one word of disapprobation to utter, but on the contrary wished it to be understood that Brown did nothing wrong. He called Brown the "first fruits" of the repeal of the Missouri line; thus clearly intimating that it was to be followed by more of the same sort. We believe that a fair deduction from the speech, altogether, is that Hon. Galusha A. Treason Preached from the Palpif. It is truly deplorable to see pulpits consccrated to the preaching of the Gospel dese-drated to political distribes, and clegymen, bound to declare the whole counsels of the Bible, and to command obedience to the sacred injunctions of that divine law, abusing their holy eafling by fanning the worst spiof domestic discord in the false name of religion, and weakening, nay sundering, the bonds four national Union. We see black coated and white cravated imposters defiling the altars of religion by the most interrierate zeal in political strife, and repudiating every obli-

ately inculcating the foulest treasons.

These remarks were suggested to our mind by the perusal of a discourse delivered in the Church of the Puritants, New York, on last Sunday, by George B. Cheever, and reported by the most commendatory comments by the Black Republican newspapers. The subject of the so called sermon was the Harper's Ferry insurrection and the conviction of John Chester, last week, of the murder of John Brown. He characterized him as the "true Clink! Christain," whose "soul would go immediately to bis Father-to God," if he be "hanged on the gallows." The Black Republican seems to be so strong in Reverend Mr. Cheever that he forgets the most escred injunction of the scriptures, "to obey rulers," to "respect the owers that be, to " submit to every-ordinance of man," and not to be of the number of those who "are not afraid to speak evil of dignitaries." Every sane man will agree with of Daniel S. Dickinson for the Presidency in us when we say the preacher forsook his godliness, or rather, that his godliness forsook

him when he uttered the following: "If the men of peace would not apply God's law to the abolition of slavery from the face of the earth, in the shape of arguments and pungent truths and the maledictions of God. be men of war would put it in the shape of bullets and fight it out, and God would le

His "conscience" teaches him that it is right that he should ask his congregation to join him in prayer to the Almighty that He may wither and blight almost on half of our country. His "conscience" tells him that he ought to preach that obedience to the Constitution and the laws is "a system of practical atheism;" and that "hel would need no better foundation on which to stand against heaven," His "conscince templated the capture of Washington, the impels him to style the Government and all seizure of the federal government, and the in- its officers an "oligarchy of pirates," if they execute a law enacted by the representatives of the people and sanctioned by the Constitution; and his "conscience" also urges him to proclaim from his pulpit on a Sabbath morning that it was "the business of every servant of Jesus to understand and to carry out into all life" the principles which "Old John Brown, that aged man," carried out at Harper's Ferry-namely, murder, civil war,

In the wildest hour of French anarchy, never were doctrines preached more repugnant to human and divine law, more subver sive of all spiritual and temporal welfare, more opposed to order and human happiness than those preached by George B. By a despatch from Washington we learn that speculations were rife as to the object of the Government in ordering large bodies of troops to the Texan frontier, one of which is that Spain, France and England are meditating prompt action in relation to claims held by their citizens against Maxico which may involve the existence of that government, and our government is sending troops down there in order to prepare to look after the interests of our own citizens in case these intended demonstrations should bring matters to a
