blo d, by which this fluid becomes vitiated, wark, and pior. Being in the circulation, it is read a the whole lady, and may burst out in disease on any part of it. No organ is free from its a tacks, nor is there one whick it may not destroy. The scrofulous taint is variously caused by mercarial disease, low living, disordered or unhealthy food, impure air, filth and fifthy halfs, the depressing vices, and, a over all, by the venereal infection. Whatever be its origin, it is hereditary in the constitution, deschading "from parents to children unto the third and fourth generation;" indeed, it scenas to be the rod of Him who says, "I will visit the inquities of the fathers upon their children."

Its effects commence by deposition from the

Its effects commence by deposition from the blood of corrupt or ulcerous matter, which, in the lung, liver, and internal organs, is termed tubereles; in the glands, swellings; and on the surface, cruptions or sores. This foul corruption, which genders in the blood, depresses the energies of life, so that scrofulous constitutions not only suffer from scrofulous comthe energies of life, so that serofulous constitu-tions not only suffer from serofulous, com-plaints, but they have far less power to with-stand the attacks of other diseases; cone-quently, vast numbers perish by disorders which although not serofulous in their nature, are still read seed forth her district. are still rend red fatul by this taint in the system. Most of the consumption which de-cimates the human family has its origin directly in this scrofulous contamination; and many destructive diseases of the liver, kidneys, brain, and, indeed, of all the organs, arise from or are aggravated by the same cause.

One quarter of all our people are scrofulous; their persons are invaded by this lurking infection, and their health is undermined by it. To cleanse it from the system we must renovate the blood by an alterative medicine, and invigorate it by healthy food and exercise. Such a medicine we supply in destructive diseas < of the liver, kidneys, brain

Patients in advanced stages of the disease.

So wide is the field of its usefulness and so numerous are the cases of its journs, that alwost every section of country abounds in persons publicly known, who have leen restored from alarming and even desjectate diseases of the lungs by its use. When once tried, its superiority over every other medicine of its kind is too apparent to escape observation, and where its virtues are known, the public no longer hesisate what antidote to employ far the distressing and dangerous affections of the pulmon-ry organs that are inglient to our climate. While many inferior remedies thrust upon the community have failed and been disearded, this has gained friends by every trial, conferred benefits on the afflicted they can never forget, and produced cures too numerous and too remarkable to be forgotten.
