"New Method," by Charles Grobe, created an excitement throughout the country that has never been canaled in the world of music. We have received orders for ten thousand copies in advance of its publication; a tolerable evidence, we think, of the popularity of the author. By common consent of the musical public, Mr. Grobe is now first in rank of musical writers in this country. His supremacy has been recogthis country. His supremacy has been recognized a long time ago, and won for him the general applicuse of both teachers and pupils which is never awarded but to the rarest talents.

and acgomplishments. He has that flexibility of mind which is the guarantee of continued improvement; his power deepens and strengthens with exercise. In every form of music in which he has made experiments there is none in which he has not succeeded. No one who has ever perused the productions of this pleasing and inatructive author, need be informed of the beauty and elegance that pervades his writings, as they are evident and unuistate able.
