pricides and manufacturers of HOS-TETTER'S CELEBRATED STOMACH BIT-

TERS can appeal with perfect confidence to physicians and citizens generally of the United States, because the article has attained a repu-tation hereoforb unknown. A few facts upon this point will speak more powerfully than volumes of bare assertion or blizoning puttery. The consumption of Hostetter's Stomach Bitters for the last year amounted to over a halfmillion bottles, and from its manifest steady increase in times past, it is evident that during the coming year the communion will reach near one million bottles. This immense amount could dever have been sold but for the rare medicial projecties contained in the prepara-tion, and the enection of the most prominent physicians in those sections of the country where the article is best known, who not only recommend the Bitters 15-their patients but are really at all times to give testimonials to its efficacy in all cases of stomachic derangements and the diseases resulting therefrom. This is not a temporary popularity, obtained by extenordinally efforts in the way of frumpeting the qualities of the Ditters, but a solid estimation of an invaluable in dicine, which is

their cares are so harassing that many of them sink under the trial. The relation of mother and child is so absorbingly tender, that the mother, especially if she be young, is apt to forgether own health in her extreme anxiety for het infant. Should the period of materalty arrive during the summer season, the wear of body and mind is generally aggravated. Here, then, is a necessity for a stimulant to recuperate the energies of the system, and enable the mother to bear up under her exhausting trials and responsibilities. Nursing mothers generally prefer the Eitters to all other invigora-

part of the body can escape their truly wonder, ful influence.

The experience of thousands daily proves that no preparation of Iron can for a moment be compared with it. Impurities of the blood, ds. pression of vital energy, pale and otherwise sickly complexions indicate its necessity in almost every conceivable case. In all cases of female debility (fuor albus, chlorois, étc.), its effects are delightfully renovating. No remedy has ever been discovered, in the whole history of medicine, which exerts such prompt, happy, and fully restorative effects. Good appetite, complete digestion, rapid acquisition of strength, with an unusual disposition far active and cheerful exercise, immediately follow its use. As a grand stomachic and general restorative it has no superior and no substitute.
