THE ANALGAMATION OF LANGUAGES. There is a growing tendency in this age to appropriate the most expressive words of other languages, and after a while to. incorporate them into our own; thus the word Cephalic, which is from the Greek, signifying "for the head," is now becom-ing popularized in connection with Mr. Spalding's great Headache remedy, but it will soon be used in a more general way, and the word Cephalic will become as com mon as Electrotype andmany others whose distinction as foreign words has been worn away by common usage until they seem , native to the manor born." .

HEADACHE is the favorite sign by which nature makes known any deviation whatever from the natural state of the brain, and viewed in this light it may be looked on as a safeguard intended to give notice of disease which might otherwise escape attention, till too late to be remedied ; and its indications should never be

neglected. Headaches may be classified under two names, viz: Symptomatic and Idiopathic. Symptomatic Headacho is exceedingly common and is the pre-cursor of a great variety of diseases, among which are Apoplexy, Gout, Rheu-matism and all febrile diseases. In its nervous form it is sympathetic of disease of the stomach constituting sick headache, of hepatic disease constituting billious headache, of worms, constipation and other disorders of the bowels, as well as renal and uterine affections. Diseases of the heart are very frequently attended with Headiaces : Anæmia and plethora are also affect ons which frequently occasion headache. Idiopathic Headache is also very common, being usually distinguished by the name of nervous headache, sometimes coming on suddenly in a state of apparently sound health and prostrating at

once the mental and physical energies, and in other instances it comes on slowly, heralded by depression of spirits or acerbity of temper. In most instances the pain is in the front part of the head, over one or both eyes, and sometimes provoking vomiting; under this class may also be named Neuralgia.

GENTLEMEN, - After suffering for more than thirty ytars with Depressa, and trying many remedies rec-ommended for that disease without any good result, I was induced, by Dr. F. IJ. I am now nearly seventy-five years of age, and for three months past-have felt no inconvenience from my food. from a form of dyspepsia, which was attended with a

The use of one bottle warranted a further trial, to the extent of some three or four, with a careful observance

and their depressing, painful consequences. I believe these Bitters produced an entire change in the habits of

my system, and upon the active energies of the digestive organs. I now deem myself as exempt from Dyspepsia
