----Reliable Testimony. We call the attention of the reader to the following letter from President Smith, formerly of Wesleyon

University, and now of Annapolis, Md. MIDDLETOWN, Conn., Feb. 98, 1859. SETH W. FOWLE & CO. -- Gentlemen: -- J first made use of the Oxygendted Bitters some seven or eight years since. Having suffered for twenty years from a form of dyspopsis, which was attended with a nervous headache, on an average of not less than one day in a week, I was induced, by the unpretanding recsemmendation of Dr. Green, "to try one pottle, and if no benefit was received to discontinue the nee." The use of one bottle warranted a further trial, to the extent of some three or four, with a careful observaof the accompanying directions. The result was, an almost entire railed from the usual dyspeptic symptoms and their depressing, painful consequences. I believe and their depressing, painful consequences. I believe these Bitters produced an entire change in the habits of my system, and upon the active energies of the digestive organs. I now does myself as exempt from Dyspepsia as most persons. These Bitters have also been of ser-

vice to other members of my family.

Very respectfully yours, AUGUSTUS W. SMITH

RICHMOND, Tioga Co., Pa., Aug. 25, 1858. GENTLEMEN, -- After ouffering for more than thirty pars with Dispersion, and trying many retaction recommended for that disease without any good result, I was induced, by Dr. F. H. White of Manufald, to give the Crygenetid Bitters a trial. I took two bottles, which gave me so much relief that I purchased two more, which have nearly or quite effected a cure. I am now nearly seventy-five years of age, and for three mouths past have felt no inconvenience from my food. I take great pleasure in recommending the Bitters to all afflicted with Dyspepsia and its concomitant diseases.

From Dr. White. MANESTELD, Tiops Co., Pe., Aug. 98, 1868. There used the Orygenated Bitters in my practice with decided recess in deathly and general promuniton, &c., and confidently recommend them in general destility, and discussed the dignetive organs.
