CELEBRATED NOISELESS SEWING MACHINES.

FOR FAMILY AND MANUPACTURING USE 495 Broadway, New-York. Agencies in all the principal Cities and Towns in the United States.

Towns in the United States.

The Grover & Baker Sewing Machine Company are now manufacturing, and have on exhibition at their different salesrooms, machines anaking the Shattle by Lock Stirch, of the same patterns and at the sime prices as their celebrated Grover & Baker Stirch Machines, thus affording the public the advantage of comparing the sith he of the the leading machines and exercising their own judgment as to their respective men is. "This is the only company that manufactures both kinds of machines and therefore the only one that can offer this privilege to the parabaser.

We speak from experience when we say that, after having tried all the principal sewing machines, we mast accord to that of Grover & Baker the pre-eminence. Those indispensable features of sewing, strength, unformity, and clasticity, all of which are brought out in this incomparable invention, make it the first sewing machine in the country. Others have their good points, but this combines all, and possesses every characteristic necessary to make it most desirable. "—N, Y. Christian Adrocute and Journal."

"A trial of over two years enables us to say with the greatest confidence that there is no better machine for general Family use than Grover & Baker's Sewing Machine Co. It makes a beautiful clastic seam that does not rip with wear or washing, tuns almost noiselessly, is plain, simple, easy to work, and not liable to get out of repair, fastenathe ends of its own thread, and uses threads and silks directly from the spools on which they are bought."—N. Y. Leader.

Grover & Baker's Machines' work, in their peculiar stitch, and fabrics put together by it; may wear and drop to pieces from original weakness or hard usage, but come apart or give way at the seams they cannot; they will hold together when the cloth or calico around them hangs in rags and tatters.—N. Y. Netes:

"The points we conceive most necessary and impor-tant to meet the wide range of requirements in a machine for family sewing, we find more fully combined in the Grover & Haker, vis. extent of capacity, simplicity of construction, case of management, advantage of using thread from two spools without re-winding, strength of work, clasticity, darability and regularity of sittch, and quietness of movement. We therefore make award to the Grover & Baker."—Report of Committee of Tennassee State Fair of 1800—also of St. Louis State Fair of 1860. F. B. CHANDLER, Agent,
