A LI descriptions of sores are remediable by the proparation and diligent use of this inestimable preparation. To attempt to cure bad legs by plastering the edges of the wound together is a folly; for should the skin unite, a borry, discased condition remains underneath to break out with tenfold fury in a few days. The only rational and encressful treatment, as indicated by nature, is to reduce the inflammation in and about the wound, and to soother the neighboring parts by rubbing in plenty of the Ointment as sait is forced into meat.

Diptheria, Ulcerated Sore Throat, and Scarlet and other Fovers.

A NY of the above discases may be cured by well rub. It bing the Ointment, three times a day, into the chest throat and neck of the patient; it will soon penetrate and give immediate relief. Medicine taken by the mouth must operate upon the whole system ere its influence can be felt in any local part, whereas the Ointment will do its work at once. Whoever tries the ungnent in the above manner for the discases named, or any similar disorders affecting the chest and throat, will find themselves relieved as by a charm,

Persons entiring from these direful complaints should lose not a moment in arresting their progress. It should be understood that it is not sufficient incredy to ament the Obinment on the affected parts, but it must be well rubbed in for rounc considerable time two or three times a day, that it may taken into the system, whence it will remove any hidden sore or wound as effectually as though palpable to the eye.
