BY GILBEET J. BEEBL. THUS PAMPHLET, consisting of 64 double column parts, was originally published pending the political carvass of 1560. The "impending Crisis," is a compl-listication of all the sophisms and malicious doctrines by which hispablic mind of the North had been so far pols-orhed as to produce the triumph of the Presidential can-idiate of the sections party last fall. I it was widely cla-chased gratationaly, by means of large contributions of morey, and did more than any other thing to deceive the masses of our people. In this Review and Revisition, we take ap each of its chapters separately, and every impor-tant assumption in detail, and refute them so completely that no intelligent person can read the pamphlet without being powering of the falsity of all the wicked assump-tions of the Heiger book and of the folly of the sectional strife which has culminated in civil war. As there is no probability that peace will be permanently restored to our districted land until the public mind at the North is disbused of the science the data of other failers both with ad South, --ti becomes the daty of all trap parties both with and South, and there is probably no more effic-ient means of accomplishing this result, than by general circulation of onr. Refusicion, of Heyrer. It contains a large amount of valuelies and the price of the pamphlet, to all intelligent editors. Frice 25 cents per copy, or \$3 per doan-senty mult, postage prepaid. Address Proton could never have been hold but for the rare medicinal properties contained in the prepara-tion, and the sauction of the most prominent by a contrast of the most promised physicians in those sections of the country where the article is best known, who not only recommend the Bitters to their patients, but are ready at all times to give testimonials to its efficacy in all cases of stomachic derangements and the discases resulting therefrom. This is not a tampater reputation that the disc and the diseases resulting therefrom. 3 This is not a temporary popularity, obtained by extraordinary efforts in the way of trum-peting the qualities of the Bitters, but a solid estimation of an invaluable medicine, which is destined to be as enduring as time itself. a Godsend to regions, where fover and ague and various other billious complaints have counted their victims by hundreds. To be able to state confidently that the "Bilters" are a certain cure for the Dyspepsis and like discases, is to the proprietors a source of un-alloyed pleasure. It removes all morbid matter from the stomach, purifies the blood, and imparts renewed vitality to the aerous system, giving it that tone and energy indispensable for the restoration of health. It operates upon the stomach liters will other dignative organs

the stomach, liver, and other digestive organs, mildly but powerfully, and soon restores them to a condition essential to the bealthy discharge

of the functions of nhture. Elderly persons may use the Bilters daily as per directions on the bottle, and they will find in it a stimulant peculiarly adapted to comfort declining years, as it is pleasant to the palate, Invigorating to the bowels, excellent as a tonic, and rejuvenating generally. We have the evi-dence of thousands of aged men and women who have experienced the benefit of using this preparation while suffering from stomach de-rangements and general debility, acting under the advice of physicians, they have shandoned the advice of physicians, they have abandoned all deleterious drugs and lairly tested the marits of this article. A few words to the marits of this article. A few words to the geniter sets. There are certain periods when their cares are so harassing that many of them sink under the trial. The relation of mother and child is so, absorbingly tender, that the, mother, especially if she be young, is apt to forget her own health in her extreme anxiety for her infant. Should the period of maternity arrive during the summer season, the wear of body and mind is generally aggravated. Here, then, is a necessity for a stimulant to recupe-rate the energies of the system, and enable the mother to bear up under her exhausting trials and responsibilities. Nursing mothers gene-rally prefer the Bitters to all other invigora-tors that receive the endorsement of physitors that receive the endorsement of physicians, because it is agreeable to the taste as well as certain to give a permanent increase

made use of the Orygeneted Bitlire some seven or eight years since. Having suffered for twenty years from a form of dyspepsia, which was attended with a nervous headache, on an average of not less than one day in a week, I was induced, by the unprotending recommendation of Dr. Green, " to try one bottle, and if no benefit was received to discontinue the use." The use of one bottle warranted a further trial, to the extent of some three or four, with a careful observance of the accompanying directions. The result was, an almost enter relief from the scal dyspetite symptoms and their depressing, painful consequences. I believe these Bitters produced an entire change in the habits of

my system, and upon the active energies of the digestiorgans. I now down myself as exempt from Byspepsia as most persons. These Bitters have also been of set-vice to other members of my family.

This is a remedy so universally known to surpase any other for the cure of throat and lung complaints, that its is useless here to publish the evidence of its virtues. Its univalled excellence for coughs and colds, and its truly wonderful cures of pulmonary disease, have made it-known, throughout the eivilized nations of the earth. Few are the communities, or even families, among them who have not some personal experience of its effects— some living trophy in their milds of its victory over the suble and dangerous disorders of the throat and lungs.
