Commodoro Foote telegraphs from Cairo that he sent a party on a reconnoise same down to Columbus, and found that the Rebels have been several days evacutating the place. All the infantry have gone, but the cavairy were still there, keeping up appearances. Their barracks keeping up appearances. Their barracks and a large number of stores have been burnt. The guns on the bluff have been taken, but those on the water batteries

ctill remain.
On learning that the Rebels have been using flags of truces for several days, to cover their retreat, Commodore Roote ordered out his fleet and sent them down to take the place and whatever has been

Talls undersigned having been emposited an anditor.

The third court of Common Pleas of Wyoming Lounty to make distribution of the find raise of finding the statements correct—under these circumstances, unless these statements were correct, their would be no use in their being made. It is considered the real estate of bars start, by the sheight of salid contry, will attend to the duties of said appointment at the office of Smith & Horse, in the borough of Tunkhamock, on Saturday, March 15, 1862, at 10% clocks, a. m., as which time and place all persons interested in shift finds are not tified to present their claims, or they will be distanced therefrom. [Ichia 41] F. C. ROSS, Aultier.

The left find the statements correct—under these considered would be no use in their being made. It is considered the Best Fruit Soil [in the Union.]

[See report of Splon Robinson, Esq. of the New York religions the first their claims, or they will be distanced the well known agriculturist. William Parry, of Cinnaminson, New Jersey, which will be furnished inquirers.]

The left of the boundary of the first theory of the statements correct, their would be no use in their being made. It is considered to present their claims, or they which are the constant of the

By looking over a map the reader will be receive that it enjoys the best market in the Union, and has direct communication with N. w York and Philadelphia troics a day being outly thirty-two miles from the latter. Produce in this market brings double the price that it does in Jecations distant from the cities. If this location it can be seen to be a superficient to the cities. If this location it can be seen to be superficient to the cities. tions distant from the cities. In this location it can be not into the market the same morning it is gathered, an for what the farmer relis he gets the highest price; while groceries and other articles he purchases he gets at the lowest price. In the West, what he sells brings him interaction for what he buys he pays two prices. In locating here the settler has many other advantages. It is within a few hours, by railroad, of all the great cities of New England and the Middle States. He is near his old friends and associations. He has school for his childer, divine service, and all the great cities of new England and the Middle States. He is near his old friends and associations. The has school for his childer, divine service, and all the gladyantages of civilization, and he is near a large city.

s delightful; the winters being salubrious and oper thillst the summers are no warmer than in the North-be location is upon the line of latitude with norther inchia.

Virginia. Pensons Wanting a Change of Clinate for Health, would be much benefited in Vineland. The mildness of the climate and its bracing industace, makes it excellent for all pulmonary offections, dyspeptia, or general debility. Visitors will notice a difference in a few days. Childs Conveniences at Hand.

Building material is plenty. Fish and oysters as cleariful and cheap.
Wisitors must expect, however, to see a new place. pleutiful and cheap.

Why the Property has not Been Settled files force.

Why the Property has not Been Settled files force.

This question the reader naturally asks. It is because it has been held in large tracts: by families not disposed to sell, and being without railroad facilities they had few inducements. The railroad has just been opened throther property this season, for the first time.

Visitors are shown over the land in a carriage, free of expense, and afforded time and opportunity for thorough in vitigation. Those who come with a view to settle, should bring money to secure their purchases, as locations are not held who had been the property that the land in a carriage, free of expense, and not be to the land of the land in a small force, and possible allows. They can buy a piece of land at a small price, and sern more than wares in improving it, and when it is deneit is a certain independence and no loss. A few acres in fruit trees will inserse a comfortable living. The land is just down to hard-time prices, and all improvements can be made at a cheaper rate than most any other time.

The whole tract, with six miles front on the railroad, is being laid out with fine and spaclous avenges, with a town in the centre—five acre lots in the town sell at from \$150 to \$200; two and a half screet lots, at from \$500 \$120 and town lots 50 feet front by 150 feet deep, at \$100—payable one-half cash and the balance within a year. It is only upon farms of twenty acres, or more, that four years time is given.

TO MANUFACTUREERS, the town affords a fine opening for the Stille improvements and other services with a power of the stille improvements and other services are not server and the particle between the services are not server and the service between any other services are server.

REPORT OF SOLON ROBINSON. OF THE NEW YORK TRIBUNE,

VINELAND SETTLEMENT. The following is an extract from the report of solon Robinson. Est, published in the New York Tribuna, in reference to Vineland. All persons can read this report with interest. Advantages of Farming near Home-Vineland-Remarks upon Marl-Soil, its great Fertility-The

marks upon Mari.—Soil, its great Fertility—The Cause of Fertility—Amount of Crops Produced—Practical Swidenos.

It is certainly one of the most extensive fertile tracts, in an almost level position, and suitable condition for pleasant farming that weknow of this elde of the western prairies. We found some of the oldest farms apparently just as profitably productive as when first cleared of forest fifty or a bundred years ago.

The geologist would soon discover the cause of this continued fertility. Their whole country is a marine deposit, and all through theiself we found evidences of, edicareous substances, generally in the form of inquinted calcareous marl, showing many distinct forms of facient shells, of the teritary formation; and this marly substance is scattered all through the soil, in a very pomininted by such plants as the fariner desires to cultivate.

Marl, in all its forms has been used to fertilize crops in England, from the time it was occupied by the Romans; and in France and Germany a marlbed is counted on as a valuable bed of manure, that can be dug and carted and spread over the field. How much more valuable them it must be when found already mixed through the soil; where now particles will be turned up and exposed, and transformed to the owner's use, every time he stirs the carth.

Having then satisfied our minds with the carse, they

Having then satisfied our minds with the cause, they will not be excited with wonder at seeing indubitable evidence of fertility of a soil which nor situations, having the same general characteristics or at least appearances, is entirely unremunerative except as its productive nees is promoted by artificial fertilization.

A few words about the quality and value of this land for cultivation, of which we have some strong proof.

Our first visit was to: William D. Wilson, Franklin thomship, Gioncester county, who purchased some eight miles north of Milivilia, about three years ago, for the purpose of establishing sisteam mill, to work up the timber into inmber, to sendoof by the new railroad, as well as the firewood and coal, for which he built a track a mife angle a half long. It is also furnished extrem miles of the road which ties, and had no doubt made the mill profitable, though his min object wasto open a firm, having become convinced that the soil was valuable for cultivation. In this he has not been disappointed, as some or his crops prove. For instance, the second time of cropping, 300 hashelsof potatoes on one acord, time of cropping, 300 hashelsof potatoes on one acord, with out manure, produced 350 bashels of oats. In one field, the first crop was potatoes, planted among the roots, and yielded 750 hashels. The potatoes, were dig, and whent sown, and yielded 15 burslets; and the slubble thread miles of the continuous co

titul.

Other portions have been planted with corn as a first crop, which yielded thirty bushels of yellow flint corn, and the second crop forty bushels, and the third crop, treated 150 pounds of grand, we are sure no one would estimate below forty bushels per acre.

The reader will recollect that the writer is now speaking of lands perfectly new, and which can scarcely be considered in good arable condition.—En.] IT CONSISTS of 20,030 acres of GOOD fand, divided into farms of different sizes to sult the purchaser—from 20 acres and upwards—and is sold at the rate of from fifteen so twenty dollars per acro for the farm Land, payable one-fourth cash, and the balance by quarter-yearly stallments, with legal interest, within the form of four years.

THE SOLL.

Is, in great part, a rich clay learn, witable for Wheat, Grass and Followed and Sold and Sold arther of the farm of loar years.

Is in great part, a rich clay learn, witable for Crope, and the great variety of fruit, such as grapes, pears, peaches, apricots, Nectarines, blackberties, mellons and other fruits, best adapted to the Philadelohia and New York markets. In respect to the soil and group there can be no mistake, as visitors can examine both, and none are expected to buybefore so doing, and finding these statements correct—under these circumstances, unless these statements correct, there would be no use in their being made. It is considered to country, and who may read and believe what we have truly stated, he will do well to go and see for himself what may be seen within a two hour ride of Philadelohia.

illized life.

If any one, from any derangement of business, is desirons of changing his pursuits for life, or who is from an cause desirous to finde new location and cheap home is the country, and who may read and believe what we have truly stated, he will do well to go and see for himself wha may be seen within a two hours ride of Philadelphia.

Ethios. EXAMINING COMMITTEE:

ments.
The course of instruction comprises every department of business. The learner will be thoroughly taught the science and practice of Double Entry Book-Keeping as applied to the following kinds of business, viz: General Merchandising, Manufacturing, Banking, Commission, Steamboating, Railroading, Forwarding, Ferialting, Foreign Shinning, &c. ments.

Can qualify themselves in a short time, at this Institu-tion to all important and incrative estrations. Ample references can be given where graduates of 1890, are now filling desirable situations with galarics from \$500 to \$1000 num guestable per annum.

The Proprietors are in possession of testimonials from some of the first Commercial Houses in the State, to whom they have furnished book-keepers, showing their entire satisfaction and confidence in the ability of the graduatus of this Institution.

PENMANSHIP
Is all its branches, taught by the most skillful and therough masters of the sit. No College in the country enjoys a higher reputation in this department. Ladles' Department untirely separate from that of the gentlemen. Students can cuter College at anytime. No vacations. Time to complete the course, from \$\frac{1}{2}\text{ to 10}\text{ weeks. Eindents passing the requisite examination are presented with the most clahorate and elegant engraved Diploms issued by any Commercial or Classical institution in the Union. Assistance rendered to graduates in procuring situations.

Commercial College; Binghamton, N. Y. Mark These Facts!

Bad Legs, End Breasts, Sores and Ulcers. All destriptions of sores are remediable by the prop. A crand different use of this inestimable preparation. To attempt to cure bad legs by plastering the edges of this wound together is a folly; for should the skin unite, a buggy diseased condition remains undermeath to break out with tenfold fary in a few days. The only rational and successful treatment, as indicated by nature, is to reduce the inflammation in and about the wound, and to soothe the neighboring parts by rubbing in plenty of the Ointment as salt is forced into meat.

Holloway's Ointment!

Otherment as sailt is forced lipto medi.

Diptheria, Ulcerated Sore Throat, and Scarlet and other Fevers.

A NY of the above diseases may be cared by well rub.

A bing the Ointment, three times a day, into the chest, throat and neck of the patient; it will soon penetrate and give immediate relief. Medicine taken by the mouth must operate upon the whole system ere its influence can be felt in any local part, whereas the Ointment will do its work at one. Whoever tries the ungment in the above manner for the diseases named, or any similar disorders affecting the chest and throat, will find themselves relieved as by a charm.

Piles, Fistula, Strictures.

Files, Fisstula, Strictures.

Files bore class of complaints will be removed by Inghity fomenting the parts with warm water, and then most effectually rubbing in the Olutiment. Persons suffering from these directal complaints should lose not a moment in arresting their progress. It should be understood that it is not sufficient merely to smear the Olutiment on the affected parts, but it must be well rubbed fefor some considerable time two or three times a day, that it may taken into the system, whence it will remove any hidden sore or wound as effectually as though palpable to the eye. There again bread and water poulities, after the rubbing in of the Olutiment, will do great service. This is the only sure treatment for females, ease of cancer in the stomach, or where there may be a general bearing down.

Indiscretions of Youth:—Sores and Ulcers. Indiscretions of Youth :-- Sores and Ulcers.

DIOTCHES, as also swellings, can, with certainty, be radically cured if the Ointment'be used freely, and the Pills be taken night and morning as recommended in the in the printed instructions. When treated in any other way they only dry up in one place, to break out in another; whereas this Ointaient will remove the humor another; whereas this Ointment will remove the humor from the system, and leave the patient a vigorous and healthy being. It will require time with the use of the Pills to ensure a lasting cure.

Dropaical Ewellings, Paralysis and Stiff Joints.

A LTHOUGH the above complaints differ widely in the theoretical and nature, yet they all require local treatment. Many of the worst cuses, of such diseases will yield in a comparatively short space of thise when this ointment is diligently rubbed into the parts affected, even after every other means have failed. In all serious maladies the Pills should be taken according to the printed directions accompanying each box.

Both the Ointment and Pills should be used in

Wondes, Yaws &c. &c. &c.

CAUTION:—None are genuine unless the words "Hot.
Lowar, New Your and London," are discernible as a
water-mark in every leaf of the book of directions around
each pot or box; the same may be plainly seen by Leiding
the leaf to the sight. A handsome reward will be given to
any one rendering such information as may leaf to the
detection of any party or parties counterfeiting the mediclines or vending the same, knowing them to be apprima"a" Bold at the Manufactory of Professor Hotloway, 50.
Maiden Lane, New York, and by all respectable Draggists
and Dealers in Medicine, throughout the civilized world,
in boxes at 25 cents, 62 cents, and 21 cach.

EF Three is considerable saving by taking is rger boxes.

N. B.—Directions for the guidance of patients in every
disorder are affixed to each box.
