report of solon robinson,

OF THE NEW YORK TRIBUNE, VINELAND SETTLEMENT. The following is an extract from the report of Bolon Bobinson: Esq., published in the New York Tribons, in reference to wineland. All persons can read this report with interest.

ale report with interest: dvantages of Ferming near Home Vineland Ro-marks upon Mark-Soil, its great Fertility The Canse of Fartility—Amount of Crops, Produced—Practical Evidence.
It is certainly one of the most extensive fertile tracts.

is mast be warn ment arreary mixed through the soil, where new particles will be turned up and exposen, and transformed to the owner's use every time he stirs the earth.

Having then satisfied our minds with the carase, they will not be excited with wonder at seeing indubitable evidence of fertility of a sail which is our situations, having the same general characteristics or at least appearances, is entirely waremunerative except as its productiveness is promoted by artificial fertilization.

A few words about the quality and value of this land for cultivation, of which we have some strong proof.

Our first visitaria in william D. Wilson, Franklin township, disconsist county, who perchased some eight miles most hof Milville, about three years ago, for the purpose of establishing a steam mill, to work up the time berinto lumber, to send off by the new railroad, as well as the firewood and coal, for which he built a track a mile and a half long. He also farnished sixteen miles of the road whith tice, and had no doubt made the mill profitable, though his hais not been disappointed, as some or his crops prove. For instance, the second time of cropping, 356 bishels of potatows on one acre; worth 60 cents a bashel in the field. This year, seven acres, without manure, produced 356 bankels of costs. In one field, the first crop was potatoes, planted among the roots, and yielded 15 bushels; The potatoes were dur, and wheat sewn, and yielded 16 bushels; and the stuble of roots and rime of exapping and wheat sewn, and yielded 16 bushels; and the stuble in the field. The year of the subject and wheat sewn, and yielded 16 bushels; and the stuble of roots and yielded 15 bushels. The potatoes were dur, and wheat sewn, and yielded 16 bushels; and the stuble of the critilizaris applied to these crop 34 kous per acre.

The fertilizaris applied to these crop 34 kous per acre.

The fertilizaris applied to these crop 34 kous per acre.

The fertilizaris applied to these crop 34 kous per acre.

The fertilizaris applied to these crop

hing while we were there promises more, of a very p grain, and the straw is very heavy. went over the stubble and found the clover and thy, from seed sowed last apring, on the wheat with

he overplus if it overruns the ostiniate.

Part of the land was planted with potatoes for a first rop, which yielded one hundred and twenty bushels per cre. It was then limed with fifty hushels per acre, and reded with wheat and clover, yielding, an average of ver 15 bishels per acre, and the clovernow looks beautiful. In other cases the corn crop offast year was followed with case this season, not yet threshed, but willswerage, robably forty to fifty bushels. Swelt potatoes, benns, neitons, and in fact, all texetables, as well as young each and other fruit trees planted this year, show very iskink that this long nother that tract of land should.

plainly that this long neglected tract of land should re-main so notoner, and there is now a strong probability hattis will not: for under the anyloes of Mr. Landis, it will be divided into small lots, with roads located to ac-commodate all—the serveyor is now they at this work— and all purchasers will be required to build beat com-fortable houses, and either fence their lots in uniformity, or agree to live without fonce, which would be prefera-ble, by which means a good population will be secured who will establish churches, schools, stores; mills, ma-chine shops and homes—homes of American farmers, am-rounded by gardens, orchards, fields and comforts of civ-ilized life. laced life.

If any one, from any derangement of business, is desirns of changing his pursuits for life, or who is from any ause desirous to fluid a new location and cheap home in he country, and who may read and believe what we have ruly stated, he will do well togo and see for himself what may be seen within a two hours ride of Philadelphia.

The most popular Monthly in the world.—[N. X. Observer.

The most popular Monthly in the world.—[N. Y. Observer.

We must refer in terms of eulogy to the high tone and varied "excellences of 'Hispers's Madazurs—a journal with a monthly circulation of about 170,000 coples—in whose pages are to be found some of the choicest light and general reading of the day. We speak of this work as an evidence of the American People: and the popularity it has acquired is meried. Each Number; contains fully 144 pages of reading matter, appropriately 'llinstrated with good wood-cars; and it combines in itself the racy monthly and the more philosophical quarterly, blended with the best features of the daily journal, It has a great power in the dissemination of allows of pure literature.—Thunner's Guide to American Liferature; No Magazine in Europe or America is so well known; none has half as many readers; and we may safely say, none has received so large a tribute of admiration from the cultivated classes, that delight in a healthy, diversified, elevating periodical literature. It is the foremost Magazine of the day. The freside never had a more delightful companion; nor the million a more enterprising friend, than Harper's Magazine.—Methodist Protestons.

TERMS. TERMS.
