OAKLAND, Ind., 5th June, 1830. J. C. AYER & CO. Gents: I field it my duty to ac-mowiedge what your Saraparilla has done for me. Having inherited a Scrofulous infection, I have suffered from it in various ways for years. Sometimes it burst out in Ulcers on my hands and arma; sometimes it turned inward and distressed me at the stomach. Two years ago it broke out on my hand and movered my scalp ind ears with one acre, which was painful and loathsome by out description. I tried many medicines and server' physicians, but without much relief from any thing. In hat, the disorder grew worke. At length I was rejoired to alternitive (Baraparills), for I knew from your repa-tion that any thing you made must be good. I sent to Cheinnati and got if, and need if till it eurod me. I took fis, as you advise, in small dosse of a tesapointil over a month, and used alimot three bottles. New and healthy wills soon began to form under the sco. which after a while fell off. My skin is now clear, and I know by my retings that the discase is gone from my system. VINELAND SETTLEMENT.

ET The following is an extract from the report of olon Robinson. Eq. published in the New York Tri-was, in reference to Vinciand. All persons can read his report with inferent.

Cause, of Pertility-Amount of Crops Produced-Practical Evidence. It is certainly one of the most extensive fertile tracts in an almost level position, and suitable condition, for pleasant familing that we know of this side of the west-ern prairies. We found some of the oldest farms appa-rently just as profitably productive as when first cleared of forest fifty or a hundred years ago. The geologicat would soon discover the cause of this continued fertility. The whole country is a marine de-posit, and all through the soil we found with most of ancient is entity on the tertility formation and this marine de-posit, and all through the soil we found with set of ancient is entitied all through the soil in a very comminate orm, and in the exist condition most casily assimilated by such plants as the farmer desires to cultivate. Mart, in all its formation and the down the soil is where and mark that been beed to fartilize cropain England, from the time it was occupied by the Romane-and in France and Germany a marked is counted on as a valuable bed of mancre; that can be dug and extert and spread over the field. How much more valuable then it must be when found already mixed through the soil where new particles will be turned up and exposed, and it mansformed to the owner's use every time be all in the artin. Having then satisfied our minds with the caves: they
will not be axcited with wonder at seeing indubitable errifilence of fertility of a soil which in our situations, having the same general characteristics or at least appearances, is a promoted by artificial fertilization.
 A few word a shout the quality and value of this land for cultivation, of which we have some strong proof.

Other portions have been planted with corn as a first crop, which yielded thirty hushels of yellow flat corn, and the second crop forty bushels, and the third crop, treated 150 pounds of grano, we are sure no one would estimate below forty bushels per acre. [The reader will recollect that the writer is now speak-ing of lands perfectly new, and which can searcely be con-sidered in good arable condition, -En.]

In other cases the corn crop of last year was, followed withouts this season, not yet threshed, but will average, probably forty to fifty bushels. Sweet potatoes, beans, mellons, and in fact, all vegetables, as wells as young mellons, and in fact, all vegetables, as well as young pench and other fruit trees planted this year, show very plainly that this long neglected treat of land should re-main-bo nolonger, and there is now a strong prohability that it will not; for under the anspices of Mr. Landis, it will be divided into small lots, with roads Joenied to ac-commodute all—the surveyor is now buey at this work —and all parchasers will berequired to build next un-fortable houses, and either fence their lots in nuformity, gr agree to live without fence, which would be prefera-ble, by which means, a good population will be secured who will establish charches; schools, stores, mills, ua-ching shops and houses—house of American farmers, far-nounded by gardens, orchards, fields and comforts of sir-nized life.
