I tried many medicines and severy physicians, but without much relief from any thing. In fact, the disorder grew worse. At length I was rejoiced to read in the Gospel-Messcaper that you had prepared at alterative (Sarasparilla), for I know from your reparation that any thing you made must be good. I sent to Clandmani and got it, and used it till it cured me. I took it, as you advise, in, small doses of a teaspoonth tower a mouth, and used almost three bottless. New and healthy skin, soom began to form under the seab, which after a while fell off. My skin is now clear, and I know by my feelings that the disease is gone from my system. Yours, and remain ever gratefully, Yours,

I have cured many inveterate cases of Lucorrhora by it, and some where the complaint was caused by interaction of the wierus. The alteration itself was soon cured. Nothing within my knowledge equals it for these female derangements."
Edward S. Our physician thought nothing but extipation could afford relief, but he advised the trial of your Sarasparilla as the last record before cutting, and it proved effectual. Syphillis and Mercurial Disease.

New Orleans, 23th August, 1850.

Dr. J. C. Attr. Sir: I electrilly comply with the request of your agent, and report to you some of the effects I have realized with your Sarsaparills.

I have cured with it, in my practice, most of the complaints for which it is recommended, and have found its effects truly wonderful in the cure of Veneral and Mercurial Disease. One of my patients had Syphillite sleers in his throat, which were consuming his palate and the top of his mouth. Your Sarsaparilla, steadily taken, cared him in five weeks. Another was attacked by according to the condition of the ulceration had exten away a considerable part of it, so that I believe the disorder would soon reach his brain and kill him. But it yielded to my administration of your Sarsaparilla; the ulcers healed, and he is well again, not of course without some distinguration of the face. A woman who had been treated for the same disorder by mercury was suffering from this poison in her bones. They had become so sensitive to the weather that on a damp day she suffered excruciating pain in her joints and bones. She, too, was cared entirely by your Sarsaparilla in a few weeks. I know from its formula, which your agent gave me, that this Preparation from your laboratory must be a great xemedy; consequently, these truly remarkable results with it have not surprised me.

Fraternally yours. G. V. LARIMER, M. D.

Dr. J. C. Aven. Sir: I have been afflicted with a painful chronic Rheusattism for a long time, which beffiel the akill of physicians, and stuck to me in spite of all the remedies I could find, until I tried your Sarsaparilla. One bottle cured me in two weeks, sud restored my ceneral beatth so-much that I am far better than before I was attacked. I think it a wonderful medicine. J. FIRAM. Jules Y. Getchell, of St. Louis, writer: "I have been afflicted for years with an offection of the Liver, which destroyed my health. I tried every thing, and every thing failed to relieve me; and I have been a broken-down man for some years from no other cause than derangement of the Liver. My beloved pastor, the Rev. Mr. Espy, advised me to try your Sarsaparilla, because hu said he knew you, and sny thing you made was worth trying. By the blessing of God it has cured me, and has so purified my blood as to make a new man of me. I feel young again. The best that can be said of you is not half good enough."

It is certainly one of the most extensive fertile tracks, in an almost level position, and suitable condution for pleasant farming that we know of this side of the west-orn prairies? We found some of the oldest farms apparently just as profitably productive as when first cleared of forest filly or a hundred jears ago.

The geologist would some discover the cause of this continued fertility. The whole country is a marine deposit, and all through the soil we found evidences of calcareous mark, showing many distinct forms of another hale, of the terilary formation; and this finally assistance is weatered all through the soil, in a very comminated form, and in the exact condition most can by assimilated by such plants as the farmer desires to cultivate.
