Housticker's Bitomach Bitters have proved a Godsend to regions where fiver and ague and various other billous complaints have sounded their visions by hundreds. To be able to state confidently that the "Bitters" are a contain cure for the Dyspepsia and lika diseases, is to the proprieters a source of undiseases, is to the proprietors a source of un-alloyed piesears. It removes all morbid matter from the stomach, purifies the blood, and imparts reasoned vitality to the nervous system, giving it that tone and energy indispensable for the restoration of health. It operates upon the stomach, liver, and other digestive organs, mildly but powerfully, and soon restores them to a condition essential to the healthy discharge

to a condition essential to the healthy discharge of the functions of nature. Elderly persons may use the Bitters daily as per directions, on the bottle, and they will find fin it satimulant peculiarly adapted to comfort declining years, as it is pleasant to the palate, invigorating to the bowels, accellent as a tonic, and reinvensing generally. We have the cri-dence of thousands of aged men and women who have experienced the benefit of using this preparation while suffering from stomach de-rangements and general debility; acting under the bartice of physicians, they have abandoned the dvice of physicians, they have abandoned all deleterious drugs and fairly tested the merits of this article. A few words to the merits of this article. A few world to the gentler sox. There are certain periods when their cares are so harassing that many of them sink under the trial. The relation of mother and child is so absorbingly lender, that the mother, especially if she be young, is apt to forget her own health in her extreme anxiety for her infant. Should the period of maternity arrive during the summer season, the wear of body and mind is generally aggravated. Here, body and mind is generally aggreated. Here, then, is a necessity for a stimulant to recupe-rate the energies of the system, and enable the mother to bear up under her exhausing trials and responsibilities. Wursing mothers gene-rally prefer the Bitters to all other invigora-tors that receive the endorsement of physi-cians, because it is agreeable to the taste as

cians, because it is agreeable to the faste as well as certain to give a parmanent increase of bodily strength. All those persons, to whom we have particu-larly referred above, to wit: sufferers from fever and ague, caused by malaria, diarthœs, dysentery, indigestion, loss of appetic, and all diseases or derangements of the stomach, superannuated invalids, persons of scientary eccupation, and nursing mothers, will consult their own physical Weifare by eiving to Hostheir own physical welfare by giving to Hos-tetter's Celebrated Stomach Bitters a trial. Mr. Wijson's growing crops, sud the wheat stabble of the pre-with secson, all indicate his land as productive as any partiof thig State. At Mary Barrow's, an old style Jersey woman farmer, several miles south of Mr. Wilson's, we were opartien-iarly struck with the fine appearance of a field/form, that we stopped to inquire of the hired man how 'ft was pro-duced. We found that the land had been the year but one before in wheat, sown with clover, and this cut one seasoni and last spring plowed once, with one "poor old may," night playted with curn. The trick coins acid of beets, carrois, cabage, cucam-bers, mellons, 'ac., and a very productive patch of Lima beans, grown for marketing. So we were satisfied that the soil was not infertile, even unaided by clover, which had fed the corn, because the "truck patch" had not been clovered, and had been in cuitivationiong enough to ob-literate all signs of the forest.
