The proprietors and manufacturers of HOS-TETTER'S CELEBRATED STOMACH BIT-TERS can appeal with perfect confidence to physicians and citizens generally of the United States, because the article has attained a repu-States, because the article has attained a repu-tation heretofore unknown. A few facts upon this point will speak more powerfully than volumes of bare assertion or blasoning puffery. The consumption of Hestetter's Stomach Bit-ters for the last year amounted to over a half-million bettles, and from its manifest steady increase in times past, it is evident that during the coming year, the consumption will reach the coming year the consumption will reach near one million bottles. This immense amount could never have been sold but for the rare medicinal properties contained in the prepria-tion, and the sanction of the most prominent tion, and the sanction of the most prominent physicians in those sections of the country where the article is best known, who not early recommend the Bitters to their patients, but are ready at all times to give testimonials to its

are ready at all times to give testimonials to its efficacy in all cases of stomachic derangements and the diseases resulting therefrom.

This is not a temporary popularity, obtained by extraordinary efforts in the way of trustice peting the qualities of the Bitters, but a solid estimation of an invaluable medicine, which is destined to be as enduring as time itself.

Hostetter's formach litters have proved a Godsend to regions where fever and agent Hiostettar's Stomach Bitters have preved as Godsend to regions where fever and ague and various other bilious complaints have counted their victims by hundreds. To be able to state confidently that the "Bitters" are a certain cure for the Dyspepsis and like diseases, is to the proprietors a source of unalloyed pleasure. It removes all morbid matter from the stomach purifies the blood and from the stomach, purifies the blood, and imparts renewed vitality to the nervous agatem, giving it that tone and energy indispensable for the restoration of health. It operates upon the stomach, liver, and other digestive organs, mildly but powerfully, and soon restores them to a condition essential to the healthy discharge

of the functions of nature.

Elderly persons may use the Bitters daily as per directions on the bottle, and they will find in it a stimulant peculiarly adapted to comfort declining years, as it is pleasant to the palate, invigorating to the bowels, excellent as a tonic, and rejuvenating generally. We have the avi-cence of thousands of aged men and women who have experienced the benefit of using this preparation while suffering from stomach de-rangements and general debility; acting under the advice of physicians, they have abandoned all deleterious drugs and fairly tested the merits of this article. A few words to the gentler sex. There are certain periods when their cares are so harassing that many of them sink under the trial. The relation of mother and child is so absorbingly tender, that the mother, especially if she be young, is apt to forget her own health in her extreme anxiety for her hisant. Should the period of maternity errive during the summer senson, the wear of body and mind is generally aggravated. Here, then, is a necessity for a stimulant to recupe-rate the energies of the system, and enable the mother to bear up under her exhausting trials and responsibilities. Nursing mothers generally profer the Bitters to all other invigora-tors that receive the endorsement of physicians, because it is agreeable to the taste at

New Oblegars, 25th Anguet, 1858.

Ph. J. C. Ayre. Sir I cheerfully comply with the represent of your agent, and report to you some of the ficial have realized with your Surgarilla.

I have cured with it, in my practice, most of the complaints for which it is recommended, and have found its effects truly wonderful in the cure of Forered and Mercurial history. One of my patients and Syphilitic ulcera in his throat, which were consuming his plants and the top of his month. Your Sarsaparilla, stepdily taken, cared him in five weeks. Another was stacked by secondary symptoms in his nose, and the ulceration had enten away a considerable part of it, so that I believe the disorder would soon reach his brain and kill him. But it yielded to my administration of your Sarsaparilla; the ulcera licaled, and he is well again, not of course without some disrightation of the face. A woman, who had been treated for the same disorder by mercury was suffering from this poison in her bones. They had become so sensitive to the genther that on a damp day she suffered excruciating pain in her joints and bones. She, too, was cured entirely by your Sarsaparilla in a few weeks. I know from its formula, which your agent gave me, that this Preparation from your laboratory must be a great remedy; consequently, these truly remarkable results with it have not surprised me.

I tried every thing, and every thing failed to relieve me; and I have been a broken-down run for some years from no other cause than derangement of the Liver. My beloved pastor, the Rev. Mr. Enpy, advised me to try your Sarsapatilla, because he said he knew you, and any thing you made was worth trying. By the blessing of God it has cured me, and has so purified my blood as to make a new man of me. I feel young again. The best that can be laid of you is not half good enough."

It is certainly one of the most extensive fertile tracts in an simosthevel position, and shitable of norton, for pleasant farming that we know of this side of the western prairies. We found some of the oldest farms apparently just as profitably productive as when first cleared of forest fifty or a hundred years ago.

The geologist would soon discover the cause of this continued fertility. The whole country is a marine desposit, and all through the soil we found vidence or calcarcous abstances, generally in the form of indulated calcarcous abstances, generally in the form of indulated calcarcous that showing meany distinct ferms of sacrent such, of the terriary formation; nanothly mist published is scattered all it rough the soil, in a very committee and form, and in the exact condition most earlies are fine in the formation of the coll. We want of the formation the condition of the coll in a very collision the chart condition most carried as a trip in high and should be the collision the chart of the collision of the chart of the collision that the transformed to the owner's use every time to stire the earth.

In other cases the corn crop of last year was followed with outs this season, not yet threshed, but will average, probably forty to fifty bushels. Sweet postatoes, beens, meltons, and in fact, all vegetables, as well as young pench and other fruit trees planted this year, show very plainly that this long neglected tract of land should remain so to longer, and there is now a strong probability that it will not; for under the anspices of Mr. Landis, it will be divided into small lots, with roads located to accommodate all—the surveyor is now busy at this work—and all purchasers will be required to build neat comfortable houses, and either fence their lots in unifermity, or agree to live without fence, which would be preferable, by which medias a good population will be secured who will establish churches, schools, stores, mills, machine shops and homes—homes of American formers, surround d by gardens, orcharde, fields and comforts of civilized life.

If any one, from any derangement of business, is desirous of changing his pursuits for life, or who is from any cause desirous to find a new location and cheap home in the country, and who may read and believe what we have truly stated, he will flow well tops and see for himself what may be seen within a two hours ride of Philadelphia.
