DR. SWEET'S Infallible LINIMENT Cures toothache in one minute. DR. SWEET'S Infallible LINIMENT

OR. SWEET'S Infallible LINIMENT Has been used by more than a million people, and all

Taken internally cures colic, cholers morbus and cholers Is truly a "friend in need," and every family should have it at hand.

DR. SWEET'S Infallible LINIMENT Is for safe by all Druggists. Price 25 and 50 cents.

A Friend in Need. Try it. Dr. Sweet's Infallible Liniment

As an external remedy, is without a rival, and will affeviate pain more speedily than any other preparation. For all Rheumatic and Nervous Disorders it is truly infallible and as a curative for sores, wounds, sprains, braises, &c. its soothing, healing and powerful strengthening properties, excite the just wonder and astonishment of all who have evergiven it a trial. Over one thousand certificates of remarkable cures, performed by it within the last two years, attest the fact.

TO HORSE OWNERS!

Dr. Sweet's Infollible Liniment for Horses is unrivalled by any, and in all cases of lameness arising from sprains, bruises, or wrenching, its effect is magical and certain. Harness or saddle galls, scratches, mange, etc., it will also cure speedily. Ringbone and spavin may easily be prevented and cured in their inciplent stages, but confirmed cases are beyond the possibility of a radical cure. No case of the kind, however, is so desperate or hopeless but it may be alleviated by this liniment and its faithful application will always remove the lameness and onable the horses to travel with comparative ease.

Every Horse Owner

should have this remedy at hand, for its timely use at the first appearance of lameness will effectually prevent those formidable diseases, to which all forses are liable, and which render so many otherwise valuable horses nearly worthless.

DR. SWEET'S INFALIBLE LINIMENT is the SOLDIER'S FRIEND

And thousands have found it truly A FRIEND IN NEED!

REPORT OF SOLON ROBINSON OF THE NEW-YORK TRIBUNE.

VINELAND SETTLEMENT.

The following is an extract from the report of Solon Robinson, payitshed in the New York Tribune, in reference to Vineland. All persons can read this report

with interest.

Advantages of Farming near Home-Vineland-Remarks upon Mari-Soil, its great Fertility-The Cause of Fertility Amount of Crops Produced Practical Evidence.

Practical Evidence:

1t is certainly encof the most extensive fertile tracts in an almost level position, and suitable condition for pleasant farming that we know of this side of the western prairies. We found some of the eldest farms apparently just as profitably productive as when first cleared of forest fifty or a hundred years ago.

The geologist would soon discover the cause of this continued fertility. The whole country is a marine deposit, and all through the soil we find evidences of calcareous substances, generally in the form of indulated calcareous substances, generally in the form of indulated calcareous sinal, showing many distinct forms of mediated calcareous anal, showing many distinct forms of mediated calcareous and in the exact condition most easily assimilated by such plants as the farmer desires to cultivate.

Mari, in all its forms has been used to fertilize crops in England, form the time it was occupied by the Romans; and in France and Germany a mari bed is counted on as a valuable bed of manure, that can be dug and carted and spread over the field. Howmuch more valuable then it must be when found already mixed through the soil, where new particles will be turned up and exposed, and transformed to the owner's use every time he stirs the carth.

Having then antisfied our minds with the cause, they

and perspections before the public of which the most described in a waiter that a unique trial. This limiters will be contained by a unique trial. The limiters will be considered by an about the public of the pub

had fed the corn, because the "truck patch" had not been clovered, and had been in cultivation to 19 enough to obtilerate all signs of the forest.

Our next visit wasto the large farm of Andrew Sharp, five miles north of Millville, from half to a mile cast of the railroad, and just about in the centre of Vineland.—Mr. Sharp commenced work fiere in December, 1853, on 270 acres. In less than three years he has got 234 acres cleared and in crops this season, all well inclosed and divided into several fields, with cedar rail or pole fence; has built a two-story dwelling, about thirty-six or forty feet, and a smaller house for farm laborers; and a stable, and granary and some other outbuildings.

Considerable part of the land was cleared for the plow at \$9 an acre, and on some of it, the first crop was buckwheat, limed with 50 bushels in powder per acre. This crop may be put in from July 4th to 20th, and yields from 20 to 30 bushels per acre, harvested in November, when the land being sowed with 150 pounds of Peruvian guano and seeded with 17e, yielded 12 to 15 bushels per acre and \$10 worth of straw. The rye stubble turned, after cutrings off a large growth of oak sprouts, and dressed again with guano and seeded to wheat, gave 15 or 16 bushels. The crop which he was threshing while we were there promises more, of a very plump grain, and the straw is very heavy.

Philada, foot of Walnut-st, at 6 a.m., connecting at.
CRANTON, with Lackawanna & Bloomsburg R. R. for
Pittston, Wyoming Valley, Kingston and Wilkesburre
and arrive at Binghamton 7:20 p. m., connecting with

Heavy,
We went over the stubble and found the clover and
timothy, from seed sowed last spring, on the wheat withtout harrowing, looking as well as we ever saw it upon
any old cultivated farm, and with a little work done in
the winter to clear off some roots and rotten stumps, and
setting stakes to hark permanent ones, we will be able
to the crop next year with a mowing machine and we

the winter to clear off some roots and rotten stumps, and setting stakes to mark permanent ones, we will be able to cut the crop next year wi ha mowing machine and we will guarantee two tons per acre, if he will give the overplus if it overruns the estimate.

Part of the land was planted with potatoes for a first crop, which yielded 120 bushels per acre, and seeded with wheat and clover, yielding an average of over 15 bushels per acre, and the clover now looks beantiful.

Other portions have been planted with corn as a first crop, which yielded 30 bushels of yellow fint corn, and a second crop 40 bushels, and a third crop, treated to 150 pounds of guano, we are sure no one would estimate less than 40 bushels per acre.

The reader will recollect the writer is now speaking of lands perfectly new, and which can scarcely be considered in good arable condition.]

In other cases the corn crop of last year was followed with oats this season, not yet threshed, but will average probably 40 or 50 bushels. Sweet potatoes, beans, melous, and in fact, all vegetables, as well as young peach and other fruit trees planted this year, show very plainly that this long neglected tract of land should remain so no longer; and there is now a strong probability that it will not; for under the auspices of Mr. Landls, it will be entified to small lots, with roads located to accommodate all—the surveyor is now busy at this work—and all purchasers will be required to build neat, comfortable houses, and either fence their lots in uniformity, or agree to live without a fence, which would be preferable, by which means a good population will be secured who will establish churches, schools, stores, mills, machine shops, and homes—homes of American farmers, surrounded by gardens, orchards, fields and comforts of civilized life.

If any one, from a derangement of business, desires to change his pursuits for life, or who is from any cause desirous to find a new location and cheap home in the country, and who may read and believe what we have trul

LACKAWANNA & BLOOMSBURG

O'N and after Dec. 11th, 1862, Passenger Trains will run as follows:

VINELAND. to all wanting farms New Settlement in Vineland. A REMEDY FOR HARD TIMES.

Rare Opportunity in the Best Market, and mee Delightful and Healthful Climate in the Union. Only thirty miles south of Philadelphia, on a railroad; being a rich, heavy soil, and highly productive wheatland; Amongst

the best in the Garden State of New Jersey. TT CONSISTS of 20,000 acres of GOOD land, divided into farms of different sizes to suit the purchaser-from 20 acres and upwards—and is sold at the rate of from fifteen to twenty dollars per acre for the farm land, payable one-fourth cash, and the balance by quarter yearly installments, with legal interest, within the term of four wars.

four years. THE SOIL

is, in great part, a rich clay foam, suitable for Wheat Grass and Fotatoes—also in dark and rich sandy loam, saitable for corn, sweet potatoes, tobacco, all kinds of vegetables and root crops, and the great variety of fruit, such as grapes, pears, peaches, apricots, nectarines blackberrier, melons and other fruits, best adapted to the Philadelphia and New York markets. In respect to the soil and crops there can be no mietake, as visitors can examine both, and none are expected to buy before so doing, and finding these statements correct—under these circumstances, unless these statements were correct, there would be no use in their being made. It is considered

The best Fruit Soil in the Union. [See report of Solon Robinson, Esq., of the New York Tribunc, and the well-known agriculturist, William Par-ry, of Cinnzminson, New Jersey, which will be furn-ished inquirers.]

THE MARKET.

By looking over a map the reader will perceive that it enjoys the best market in the Union, and has direct communication with New York and Philadelphis twice a day, being only thirty-two miles from the latter. Produce in this market brings double the price that it does in locations distant from the cities. In this location it can be put into the market the same morning it is gathered, and for what the farmer sells he gets the highest price; whilst groceries and other articles he purchases he gets at the lowest price. In the west, what he sells brings him a pittance, but for what he buys he pays two prices. In locating here the settler has many other advantages. He is within a few hours, by railroad, of all the great cities of New England and the middle states. He is near his old friends and associations. He has school for his children, dvine service, and all the advantages of civilization, and he is near a large city.

THE CLIMATE is delightful; the winters being salubrious and open, whilst the summers are no warmer than in the North. The location is upon the line of latitude with northern

Virginia.

Persons wanting a change of climste for health, would be much benefitted in Vineland. The mildness of the climate and its bracing influence, makes it excellent for all pulmonary affections, dyspeps ia, or general debility visitors will notice a difference in a few days. Chilling fevers are unknown.

Conveniences at Hand.

Building material is plenty. Fish and oysters are plentiful and cheap.
Visitors must expect, however, to see a new place. Why the Property has not been Settled be-fore.

Why the Property has not been Settled before.

This question the reader naturally asks. It is because it has been held in large tracts by families not disposed to sell, and being without railroad facilities they had lew inducements. The railroad has just been opened through the property this season, for the first time.

Visitors are shown over the land in a carriage, free of expense, and afforded time and opportunity for thore investigation. Those who come, with a view to actile, should bring money to secure their purchases, as locations are not held upon refusal.

The safest thing in hard times, where people have been thrown, out of employment or business, and possess some little means or small incomes, is to start themselves a home. They can buy a piece of land at a small price, and carn more than wages in improving it, and when it is done it is a certain independence and no loss.

A few acres in fruit trees will secure a comfortable living. The land is put down to hard time prices, and all the improvements can be made at a cheaper rate than most any other time.

The whole tract, with six miles front on the railroad, is being laid out with fine and spacious avenues, with a town in fine centre—five acre lots in the town sell at from \$150 to \$200° two and a half acre lots, at from \$90 to \$120. and town lots 50 feet front by 150 feet deep, at \$100-payable one half in cash and the balance within a year. It is only upon farms of twenty acres, or more, that four years time is given.

To Manufacturers, the town affords a fine opportunity for the Shoe manufacturing business, and other articles, being near Philadelphia, and the surrounding country has a large population, which affords a good market.

This settlement, in the course of several years, will be one of the most beautiful places in the country, and most agreeable for a residence.

It is intended to make it a Vine and Fruit growing country, as this culture is the imost profitable and the best adapted to the market. Every advantage to the settlement as it comp

a living.
Large numbers of people are purchasing, and people who desire the best location should visit the place at

who desire the best location should visit the place at once.

Improved land is also for sale.

Improved land is also for sale.

I'MBER.—Land can be bought with or without timber. The timber at market valuation.

The title is indisputable. Warrantee deeds given, clear of all incumbrance, when the money is paid.

Boarding conveniences at hand.
