

THE SUNNY SIDE.

When darkest hours of sadness,
Some healing o'er the heart;
When false ones dare deceive thee
And from thy side depart;

Bear up beneath the anguish,
And brent the sinking tide,

For o'er the vale of shadowa

Oh, there's a sunny side.

Let early ties be broken,

Whoever thou hast dear

It matters but a little,

The trial how severe;

For there are many others

In whom thou canst confide,

Whe're the sad heart pine-

Yes, there's a sunny side.

Our lifetime here is fleeting,

It passes soon away,

Like Baby's dreamy vision,

And Autumn's wan decay.

Then take thou hold in earnest;

Before though thou hast tried;

Life is made up of straggles,

There's yet a sunny side.

This wide world may look dreary,

The tempest loudly roar,

While every golden moment

The life boat wafts the shore,

Delay not in thy efforts

Against the wind and tide,

To do what thou wouldest have to do

Upon the sunny side.

WINTERING SHEEP.

In reply to some inquiries in regard to his method of feeding sheep in the winter, John Johnson writes as follows to the *Genesee Farmer*:

The best time to yard sheep for fattening, or even to store sheep, is when they do not improve on the pastures. There should be no loss of condition in autumn or early winter, nor at any other time.

You want dry yards well littered, so that they can always have a clean bed, with sheds to go in when they choose, but unless quite stormy they always prefer the yards for beds.

I have fed as many as 600 in one yard, but that is too many, as they are apt to hurt each other in going to their grain. From 150 to 200 in one yard does very well.

I salt once a week when feeding grain, about two quarts to the 100 sheep. When fed oil-meal without grain, they care but little for salt, and I feed them none. It is the same with cattle. I put the salt in the troughs when there is no grain in them.

For the first two months I generally feed straw only for fodder, and have sold many fat sheep that got nothing except straw for fodder. But much depends on the condition of the straw. If the wheat is cut in a raw state—that is, not quite ripe—and gets no rain, it makes better sheep-fodder than ripe timothy hay.

I fodder the sheep three times a day in the common board racks. I feed the grain twice a day—one bushel to the 100 sheep in the morning, and another bushel about 4 p.m.

When I keep my sheep until the middle of March, they were generally increased from 20 to 22 pounds on the average, but much depends upon how much and how long I have fed clover hay, and whether I have reduced the corn or oil-meal when commencing the hay. Very fat sheep can be made with early cut clover hay and a bushel of corn, buckwheat, or oil-cake meal to the 100 sheep per day, if you can commence with the clover hay when pastures fail and continue it until March, but they eat an immense bulk of good clover hay.

It is difficult to buy sheep (good ones), for feeding purpose, at present for less than 4 cents per pound, live weight—a high figure to start with—and corn is very high, oil-cake still higher, and I fear that buckwheat won't be low. There is nothing better to fatten sheep than buckwheat. One or 1½ pounds to each sheep per day makes fine sheep.

I have been writing about fine-wooled sheep—Merinos. I have had greater increase in weight with grade Leicesters, with the same amount of oil-cake meal.

A JEALOUS BLUNDER.—A laughable incident is related of a jealous woman at Lewiston, Maine, who went into an auction room the other day, and saw (as she supposed) her husband very familiarly sitting beside a young lady. Stepping up softly, she seized a head in each of her hands, and pounded them together a number of times in great rage. Her surprise may be imagined when she found that the innocent stranger was not her "worse half." She apologized and passed on amid the laughter of the crowd.

We have had, in less than a single month, the assertion made by the three leading members of Mr. Lincoln's Cabinet that they regard Democrats as acting in sympathy with the rebellion; it requires, therefore, no very great effort at ratiocination to conclude that, if they dared, they would treat them just as they treat the armies of Bragg and Lee.

The original draft of the Emancipation Proclamation is for sale out West; and rope bid has been offered of twelve hundred dollars for it. Some Loyal League hopes it may be secured for a loyal Historical Society. Dick Turpin's commission to rob on the highway, which this eccentric rascal had drawn up, and forged the seal and signature to, recently sold in London for two hundred and forty pounds, just exactly the price offered for the Emancipation Proclamation.

DR. SWEET'S INFALLIBLE LINIMENT

FOR RHEUMATIC NEURALGIA, LUMBAGO, GOUT, STIFF NECK AND JOINTS, SPRAINS, REBURN CUTS, WOUNDS, PILES, HEADACHE, AND ALL RHEUMATIC AND NERVOUS DISORDERS.

For all of which it is a specific, certain remedy, and is prepared from the rectified oil of Dr. Stephen Sweet, of Connecticut, the famous bone-setter, and has been used in his practice for more than 30 years, with the most astonishing success.

AS AN ALLEVATOR OF PAIN, IT IS UNPARALLELED.

IT IS THE PUBLIC, OF WHICH THE MOST SUSPICIOUS ARE CONVINCED BY A SINGLE TRIAL.

THE LINIMENT WILL CURE RAPIDLY AND RADICALLY RHEUMATIC DISORDERS OF EVERY DESCRIPTION.

IT HAS BEEN SPECIALLY PREPARED FOR USE IN IRELAND FOR VARIOUS DISEASES.

FOR NEURALGIA IT WILL AFFORD IMMEDIATE RELIEF IN OVER ONE HUNDRED CASES.

IT IS THE PUBLIC'S LINIMENT AND IS WARRANTED TO DO IT.

TOOTHPACHE IS ALSO IT WILL CURE ALMOST.

FOR NEURVOS DEBILITATE AND GENERAL EXHAUSTION, ARISING FROM IMPROPER DIET, IT IS A HIGHLY CONCENTRATED REMEDY.

ACTING DIRECTLY UPON THE NERVOUS TISSUES, IT STRENGTHENS AND REVIVES THE SYSTEM, AND RESTORES IT TO CLOUDY AND DISTORTED.

FOR PILES, IT IS A HIGHLY CONCENTRATED REMEDY.

FOR HEADACHE, IT IS A HIGHLY CONCENTRATED REMEDY.

FOR RHEUMATIC DISORDERS, IT IS A HIGHLY CONCENTRATED REMEDY.

FOR RHEUMATIC DISORDERS, IT IS A HIGHLY CONCENTRATED REMEDY.
