

coming trial.

"We have no fee to offer you, but we will labor as your slaves our lifetime. Oh, do not refuse me! What is so little to you is life or death to us!" and a gasping sob closed the appeal.

He hesitated no longer, but said,

"I am very busy, but I will do my best for him—if possible. I must lose no time writing to his former acquaintances, to certify to his previous good character; and if you will give me the address I will write in the morning."

You may address my father's brother, Lemuel Washburne, L—d, Connecticut."

Suddenly the lawyer wheeled around and peered curiously at her.

"Is L—d your native place, Mrs. Wynne?"

"It is. My father was a lawyer there."

"And your name—?"

"Welthia. Washburne."

"My God, I thank thee!" came fervently from his lips, but, rising, he noted the look of astonishment with which she regarded him, he added.

"Pardon me madam. It is unsafe in the streets. I will send the carriage to take you home."

And he rang the bell for the servant, scarcely heeding the expressions of gratitude poured forth by that pale, care worn, but hopeful, thankful woman, as she left him alone.

That night, as he restlessly paced the luxurious apartment, he thought of that time so long ago, when this woman, then a gleeful child, plead to save him from a fate worse than death, and a prayer of thankfulness ascended to the Great Being that it was his privilege to restore light and happiness to that desolate home—that in this hour of peril the hand of Providence had led her to his willingly—yes, thrice willingly given aid; while in the low tenement room where Welthia Wynne laid her children to rest, innocent babyhood breathed a prayer for "the good gentleman who was going to bring back."

After anxious days of waiting the morning of Edward Wynne's trial came, and found the busy lawyer at his post. He had never worked upon an almost hopeless case with greater energy, but he had gained a clue to work from, and he was satisfied.

Impossible he ast, until the principal witness against the prisoner was called, and had given his testimony, then with a stern countenance he arose and addressed the man.

"What time in the evening was it when you saw the prisoner concealing the money?" he asked.

"At half past seven," faltered the creature, quailing beneath the searching look.

"And I can prove that at half past seven you were in a saloon on Fourth street."

And hastily following up his advantage, the man was soon arrested for the robbery, and overcome by fear, confessed the deed.

That night, as Edward Wynne sat with his family, talking gratefully of the late deliverance the door opened, and their benefactor entered.

When the gratitude they felt would have found vent in words, he said,

"No, you owe me nothing—I have but paid a debt. Mrs. Wynne, years ago, when you were a little child, you and your family saved me from a fate worse than death, and made me what I am, without reward, except such as your own hearts gave you. In saving Mr. Wynne from a similar fate I have only repaid a part of the great debt I owe you. All I have to you and yours, and think you I would see you want while I have the power to assist? Step over to my office with me, Mr. Wynne, and we will arrange a plan I have for placing the merchant's staff in your hands again."

And he tried to smile, but his lips quivered, and a mist of tears gathered in his eyes, as Mrs. Wynne sobbed her mingled greeting and blessing to him she now knew as Nathan Monroe.

And this was Welthia Washburne's reward.

## NOTICE TO THE PUBLIC.

THE subscriber respectfully informs the public that he has leased the

### Blacksmith Shop

of H. C. Clemons, near the Foundry of Sayre Brothers. Customers will do well to call, as they can get every thing for cash.

Particular attention given to Horse Shoeing.

EDWARD P. STAMP.

**Dr. N. L. Brundage,**  
**SURGEON DENTIST,**

IS permanently located in Montrose. Office over Webb's Hotel. People of vicinity, and those who have been here before, will find him a good dentist, and a practitioner far better than any other. His fees are moderate, for filling teeth does not contain mercury, and hence an absence of the difficulties that in such a variety of ways occurs, or are liable to occur with the agent.

THE NEW PATENT.

Dr. Wood's Plastic Metallic Filling, an improved malleable metal for Filling Teeth, for which I have the right, privilege and license, granted by him to use for Dental purposes in my own practice as a Dentist. It is called Calcium Alloy, and is a practice taking place in the dental profession, and is a great success. It does not contain mercury, and hence an absence of the difficulties that in such a variety of ways occurs, or are liable to occur with the agent.

ITS Qualities and Advantages.

This filling is designed for making perfect and durable platings, and for repairing broken teeth, and for inferior material where the teeth can be saved, and not for temporarily stopping those which are diseased and worthless.

It can be used as it is, or it can be melted, and for inferior material where the teeth can be saved, and not for temporarily stopping those which are diseased and worthless.

It is composed of the choicest leaves, and cured without any coloring matter of any kind.

It is easily melted, and for inferior material where the teeth can be saved, and not for temporarily stopping those which are diseased and worthless.

It is composed of the choicest leaves, and cured without any coloring matter of any kind.
