Lecture in Montrose. MR. Epron: -Will you oblige several Cheap Store. of the readers of your paper, by answering the following questions?

Is there to be a regular course of lectures in Montrose the coming winter? If so, under what auspices? And how are people who live, outside of Montrose to know when they occur, and who are to

Last Wednesday eve, I happened to be in Montrose, and hearing the Court-house bell, enquired what was going on. The versalists will hold its next Conference in answer was: "John W. Fowler lectures Benton Centre, Nov. 21st and 22d. Both here this evening."

I was greatly surprised and somewhat to attend. indignant-not because Prof. Fowler was to deliver a lecture—but because it had Dedication. been kept so very quiet that hardly a person living outside of Montrose knew anything about it.

Quite a respectable portion of the citi- a. m. zens of Dimock, and I suppore the same may be said of the other towns around Teachers' Examinations. tained.

Before they had brought their Pranos to their present excellence, they had submitted them to competition with instruments of the best makers of this country and Burope, and received the reward of merit, over all others, at the celebrated World's Fair. It is but jusall others, at the celebrated world's Fair. It is but jus-tice to say that the judgment thus pronounced has not been overfuled by the musical world.

Ntill, by the improvements lately applied by them to their Pinnos, it is admitted that a more perfect instru-ment has been made. They have accordingly achieved the paradox of making excellence more excellent.— Surely, after this, they are entitled to the motto, "Ex-celsior."

PATENTED MAY 29, 1866.

PATENTED MAY 29, 1866.

Tills is an article for washing without rubbing, except in very dirty places, which will require a very slight rub, and unlike other preparations offered for a like purpose, will 10 trot the clothes, but will leave them much whiter than ordinary methods, without the usual wear and tear.

It removes grease spots as if by magio, and softens the dirt by soaking, so that riusing will in ordinary cases entirely remove it.

This powder is prepared in accordance with chemical science, and upon a process peculiar to itself, which is secured by Letters Patent. It has been in universal favorite than a year, and has proved itself an universal favorite wherever it, has been used. Among the advantages claimed are the following, viz:—

It saves all the expense of soap usually used on cotton and linen goods.

It saves most of the labor of rubbing, and wear and tear. toar.

Also, for cleaning windows it is unsurpassed. With
one quarter the time and labor usually required it imparts a beautiful gloss and lustre, much superior to
any other mode. No water required except to moisten the powder.

en the powder.

Directions with oach package.

And can be r adily appreciated by a single trial.

The cost of washing for a family of five or six persons will not exceed three cents.

The manufacturers of this powder are aware that many useless compounds have been introduced to the public which have rotted the cloth, or failed in removing the dirt, but knowing the intrinsic excellence of this article, they confidently proclaim it as being adapted to meet a demand which has long existed, and which has herectofore remained unsupplied.
