GROVER & BAKER'S

SEWING MACHINES

WERE AWARDED THE HIGHEST PREMIUMS

At the State Fairs of New York, Illinois, Virginia, New Jersey, Michigan, N. Carolina, Vermont, Wisconsin, Tennessee, Pennsylvania, Iowa, Alabama, Ohio, Kentucky, Oregon, Indiana, Missouri, California.

At the Fairs of the American Institute, Franklin Institute, Maryland Institute, Massachusetts Mechanics' Association, Fair, Mechanics' Institute, St. Louis Agricultural and Mechanical Association.

And at numerous Institute and County Fairs, including all the Fairs at which they were exhibited the past three years.

First prizes have also been awarded these machines at the exhibitions of London, Paris, Dublin, Litz, Besancon, Bayonne, St. Dizier, Chalons,

And they have been furnished by special command to the

Empress of France, Empress of Austria, Empress of Russia, Queen of Spain, and Queen of Bavaria.

The Grover & Baker Elastic Stitch Sewing Machines are superior to all others for the following reasons:

- 1. They sew direct from the spools, and require no re-winding of thread.
2. They are more easily understood and used, and less liable to derangement than any other machine.
3. They are capable of executing perfectly, without change of adjustment, a much greater variety of work than other machines.
4. The stitch made by these machines is much more firm, elastic and durable, especially upon articles which require to be washed and ironed, than any other stitch.
5. This stitch, owing to the manner in which the needle thread is interwoven, is much the most plump and beautiful in use, and retains this plumpness and beauty even upon articles frequently washed and ironed until they are worn out.
6. The structure of the seam is such that, though it be cut or broken at intervals of only a few stitches, it will neither open, run, or unravel, but remains firm and durable.
7. Unlike other machines, these fasten both ends of the seam by their own operation.
8. With these machines, while silk is used upon the right or face side of the seam, cotton may be used upon the other side without lessening the strength or durability of the seam. This can be done on no other machine, and is a great saving upon all articles stitched or made up with silk.
9. These machines, in addition to their superior merits as instruments for sewing by a change of adjustment, easily learn and practice upon all the most beautiful and permanent embroidery and ornamental work.
