GROVER & BAKER'S SEWING MACHINES

WERE AWARDED THE
HIGHEST PREMIUMS

At the State Fairs of
 New York, Illinois, Virginia,
 New Jersey, Michigan, N. Carolina,
 Vermont, Wisconsin, Tennessee,
 Pennsylvania, Iowa, Alabama,
 Ohio, Kentucky, Oregon,
 Indiana, Missouri, California.

At the Fairs of the
 American Institute, Franklin Institute, Maryland In-
 stitute, Massachusetts Mechanics' Association,
 Pennsylvania Mechanics' Association, St. Louis
 Agricultural and Mechanical
 Association.

And at numerous Institute and County Fairs, including
 the Fair at which they were exhibited the past
 three years.

First prizes have also been awarded these machines at
 the exhibitions of
 London, Paris, Dublin, Litz, Besancon,
 Bayonne, St. Dizier, Chalons,

And they have been furnished by special command
 to the
 Empress of France,
 Empress of Austria,
 Empress of Russia,
 Queen of Spain, and
 Queen of Bavaria.

The Grover & Baker Elastic Stitch Sewing Machines
 are superior to all others for the following reasons:

1. They sew direct from the spools, and require no re-
 winding of thread.
 2. They are more easily understood and used, and
 less liable to derangement than any other machine.
 3. They are capable of executing perfectly, without
 change of adjustment, a much greater variety of work
 than other machines.

4. The stitch made by these machines is much more
 firm, elastic and durable, especially upon articles which
 require to be washed and ironed, than any other stitch.
 5. This stitch, owing to the manner in which the un-
 der thread is laid, is much the most plump and
 beautiful in appearance, and retains the plumpness and beau-
 ty even upon articles frequently washed and ironed until
 they are worn out.

6. The structure of the seam is such that, though it
 be torn or broken at intervals of only a few stitches, it
 will neither open, run, or unravel, but remains firm and
 durable.

7. Unlike other machines, these fasten both ends of
 the seam by their own operation.
 8. With these machines, while silk is used upon the
 right or face side of the seam, cut on may be used upon
 the other side without lessening the strength or dura-
 bility of the seam. This can be done on any other ma-
 chine, and is a great saving upon all articles stitched or
 made up with silk.

9. These machines, in addition to their superior merit
 as instruments for sewing, by a change of adjust-
 ment, easily learned and practiced, execute the most
 beautiful and permanent embroidery and ornamental work.
