Peddlers Arrested.

U. S. Deputy Marshal Roesler, yester-day arrested C. S. Storr and Wm. Spencer, pedlers of Lightning rods, who are charged with doing business without having paid special tax. A partial hearing of the case was had before Commissioner McKune, and the case adjourned until Wednesday next. They are also charged with neglecting to properly stamp their! contracts, as the law requires, and Spencer is charged with perjury.—Scranton Register, 25th.

Sabbath Schools.

To the District corresponding Secretaries of the Susq'a Co. Sabbath School Associa.

Upon the district secretaries devolves in a great measure the work of accomplishing the object of this association, which is defined in the 2d article of the Constitution to be, "to advance the Sabbath School cause generally in the county."

in sec. 6 art. 4 of the Constitution, which reads as follows:

tablish subordinate or auxilliary associations in their respective townships or boroughs, and shall be, ex-officio, representatives from the same to this association, and make reports of their condition, as well as of the progress of the Sabbath School cause in their vicinity, at each meeting of the association."

You are earnestly requested, not only to comply with the requirements of the Constitution, but to adopt whatever measares, and labor in whatever manner, you may deem best calculated to promote the interests of the Sunday Schools in your district, and especially in establishing missionary schools in places where there are none at present.

We have a great work to perform. Our purpose should be to bring every child of suitable age into the Sabbath School.

We trust that this association, by the blessing of God, may be the means of doing much the present year, through its various officers, towards accomplishing this desirable object.

J. Thomas' Patent Atmospheric CHURN DASH!

Patented May 7, 1867.

The most Important and Valuable Invention of the 19th Century.

1. This Dasher is superior to any other, by being as simple as the old Dasher, and combining the atmospheric principles therewith, and the Butter Gatherer 2. It is superior to all others, inasmuch as the same power applied to this in like mechanical operations will make one fourth more reciprocations.

3. It is superior to all others, inasmuch as it produces the Butter in a much shorter time.

4. It is superior to any other, innasmuch as it produces a much better quality of Butter.

5. It is superior to any other Patent Churn, inasmuch as it is 500 per cent, chesper than any other.

It is well known to Dairymen and others, that Butter is contained in minute globules or sacks, covered with a membrane, and requires the action of air to prepare the covering to be removed by iriction. The Scientific American saks:

American says:

"If, cream is dashed against a hard substance, or mashed between bars or rollers, it breaks the globules and becomes oily, by destroying the grain. It should be thrown? into currents and counter currents by the action of air, causing a friction by the action of the currents against each other, removing the covering without breaking or bursting the globules."

This is the principle which the inventor of this Dash endeavored to keep in view, and the result shows a much larger yield of Butter obtained in less time than by any other Dasher.

Experiments have proven that any other method except pumping air through the cream, will not penetrate sufficiently to oxygenize all the globules preparatory to concentrating the Butter. Throwing it into the air by clappers or old fashioned Dashers, does not sufficiently expose it to the air to bring out the Butter.

The above Patent Dasher has been purchased for Susquehanna County by the undersigned. The process of churning can be seen at any time, in a Glass Churn, at Baldwin, Allen & McCain's store. An agent will can vass the county soon as possible, to sell the Dasher for individual rights; also township rights will be sold.
