# A CARD FROM THE

Waltham, Mass.

THIS Company beg leave to inform the public that they commenced operations in 1830, and their factory now covers four acres of ground, and has cost more than a million dollars, and employs over 700 operatives. They produce 75,000 Watches a year, and make and sell not less than one-half of all the Watches sold in the United States.

The difference between their manufacture and the European, is briefly this: European Watches are made almost entirely by hand, and the result is of necessity a lack of that uniformity, which is indispensable to correct time-keeping. Both the eye and the hand of the most skillful operative must vary. But it is a fact that except watches of the higher grades, European watches are the productiof the cheapest labor of Switzerland, and the result is the worthless Ancres, Lepines and so tempted repairs, than their original price. Common workmen, boys and women, buy the rough separate parts of these watches from various factories, polish and put them together, and take them to the nearest watch merchant, who stamps, and engraves them with any name or brand that may be ordered.
