#### Local News.

We will be thankful to persons throughout the county for information in regard to all local occurences of general interest. If you feel that you cannot write for the public eye, just send us the facts, as brief as you choose to tell them. Marriages. Deaths, Accidents, Fires, Crimes etc., etc., are always matters of a public nature, occurring almost daily in every neighborhood. If you desire to have the paper interesting, do not neglect to send us the

manufacturing establishment in this county for taxes due in 1864-5-6. A large amount has also been found to be due from another firm, which will very soon be realized. These amounts have been secured in consequence of a change in officials.

Verily the new assessors have proved to possess some "efficiency;" and if you don't think so, ask these and other delinquents who are being looked after.

Fire in Susquehanna. On Wednesday night of last week, an engine which was returning from the Summit, ran into a train of coal oil cars, and fired it. A large part of the train was at once run ont of danger, and but six or seven cars, including a car of lumber, a car of shingles, and a car of cheese, were burned. The foundry of the Erie Company was considerably damaged, but by vigorous exertion the fire was kept subdued, and the building saved .- Northern Pennsylvania.

# Proofs of the Superior Quality AMERICAN WATCH

The American Watch Company, of Waltham, Mass, respectfully submit that their Watches are cheaper, more accurate, less gomplex, more durable, better adapted for general-fase, and more easily kept in order and repaired than any other watches in the market. They are simpler in structure, and therefore stronger, and less likely to be injured than the majority of foreign watches, which are composed of from 125 to 300 pieces, while in an old English watch there are more than 700 parts. How they run under the hardest trial watches can have, is shown by the following letter:

OFFICE OF THE GENERAL SUPERINTENDENT, I
ALTOONA, Pa., 15 Dec., 1866.

Gendlemen: The watches manufactured by you have been in use on this railroad for several years by our enginemen, to whom we furnish watches as a part of our equipment. There are now some three hundred of them carried on our line, and we consider them good and reliable time-keepers. Indeed, I have great ratisfaction in saying your watches give us less trouble, and have worn and do wear much longer without repairs than any watches we have ever had in use on this road. As you are aware, we formerly trusted to those of English manufacture, of acknowledged good reputation; but as a class they nover kept time as correctly, nor have they done as good service, as yours.

In these statements I am sustained by my predecessor, Mr. Lewis, whose experience extended over a series of years.

Respectfully.
