APTER.

After the shower, the tranquil sun; . After the snow, the emerald leaves; Silver stars when the day is done; After the harvest, golden sheaves.

After the clouds, the violet sky; After the tempest, the lull of waves Quiet woods, when the winds go by; After the battle, peaceful graves.

After the knell, the wedding bells; After the bud, the radiant rose: Joyful greetings from sad farewells; After our weeping, sweet repose.

After the burden, the blissful meed: After the fight, the downy nest; After furrow, the waking seed; After the shadowy river-rest.

Remarkable Discovery.

A few days ago, while some workmen were excavating a cellar in Polk township, Monroe county, Pa., the workmen struck what at first appeared to be a solid ledge of rock, and sitting down to rest, one of their number began idly to pick at an apparent fissure, when a block of stone nearly two feet square disappeared with a dull thump.

The men set eagerly to work, and removing the bottom of the pit disclosed a chamber with six feet ceiling, and eighteen by twenty-five feet within the walls, Par which are of solid, neatly seamed stone work. Ranged in rows on rudely constructed platforms, were twelve skeletons, each with tomahawk and arrow heads at their sides, ear rings and bracelets of solid silver lying where they had dropped, and piles of what appeared to have been furs, in the centre of the platform, each pile crumbling to dust as exposed to the light. A number of tools, made of coplight. A number of tools, made of copper, and hardened equal to the best steel, were unearthed, and fresh discoveries are Bros. Foundry. [June 18, 1867.—19*] per, and hardened equal to the best steel, constantly being made.-Lehigh Valley Times.

Predictions about the Winter.

We see it generally stated that European meterologists are predicting an early and hard winter this year, for the reason that the birds of passage have commenced their migration southward at least a month earlier than usual. Storks; wild ducks and other birds, are reported to be passing southward over France and Belgium in large numbers.

from time to time been noted in our country, and we are inclined to attach more. importance to them than weather prophecies usually deserve. Meteorologists say a wet summer signifies a dry winter, and dry winters are always cold. Housekeepers should make a note of this inference, which we think will prove correct.

FALL.—The present is a dreadful "fall" for the Radicals. "The melancholy days have come" to them politically, and they go about the streets looking as disconsolate as mourners at a funeral. They are now in "the sere and yellow leaf" of political existence, and will soon die out beyoud the hope of resurrection.

GRAVITY.—An exchange says, apropos of the discussion whether Newton "discovered gravity," that if he lived until this time he might have discovered it in the countenances of Radical politicians all over the country.

—Ben Wade told the people of Ohio—"You've got to have it." "It" means negro suffrage. But they didn't "got to have it." Bullying people into measures is about played out.

-The Pittsburg Republic says petitions are circulating for signatures asking the Ramp Congress to impeach the President. We are inclined to think that that little "side issue" was "done gone" last Tues. day, together with its twin-brother in iniquity-"Reconstruction?"

-The Philadelphia Post, a Radical concern, says its party was beaten because of the rascality of its leaders. We presume this is the "side-issues" which other organs of the same party talk about as producing their defeat. Rascality certainly is a bad issue to tie to.

PAINTS for FARMERS

AND OTHERS.—THE GRAFTON MINERAL PAINT COMPANY are now manufacturing the Best, Cheapest and most Durable Paint in use; two coats well put on mixed with pure linseed oil, will last 10 or 15 years; it is of a light brown or beautiful chocolate color, and can be changed to green, lead, stone, olive or drah, to said the taste of the consamer. J. Thomas' Patent Atmospheric: CHURN DASH!

Patented May 7, 1867. The most Important and Valuable Invention of the 19th Century.

1. This Dasher is superior to any other, by being as simple as the old Dasher, and combining the atmospheric principles therewith, and the Butter Gatherer.

2. It is superior to all others, inasmuch as the same power applied to this in like mechanical operations will make one fourth more reciprocations.

3. It is superior to all others, inasmuch as it produces the Butter in a much shorter time.

4. It is superior to any other, inasmuch as it produces a much better quality, of Butter.

5. It is superior to any other Patent Churn, inasmuch as it is 500 per cent, chesper than any other.

It is well known to Dairymen and others, that Butter s contained in minute globules or sacks, covered with membrane, and requires the action of air to prepare he covering to be removed by friction. The Scientific

"If cream is dashed against a hard substance, or mashed between hars or rollers, it breaks the globules and becomes oily, by destroying the grain. It should be thrown into currents and counter currents by the action of air, causing a friction by the action of the currents against each other, removing the covering without breaking or bursting the globules."

the currents against each other, removing the covering without breaking or hursting the globules." This is the principle which the fundation of this Dash endeavored to keep in view, and the result shows a much larger yield of Butter obtained in less time than by any other Dasher.

Experiments have proven that any other method except pumping air through the cream, will not penetrate sufficiently to oxygenize all the globules preparatory to concentrating the Butter. Throwing it into the air by clappers or old fashioned Dashers, does not sufficiently expose it to the air to bring out the Butter.

The above Patent Dasher has been purchased for Susquehanna County by the undersigned. The process of churning can be seen at any time, in a Glass Churn, at Baldwin, Allen & McCainla store. An agent will canvass the county soon as possible, to sell the Dasher for individual rights; also township rights will be gold. A. BALDWIN. Montrose, July 23, 1867.--tf

FOR FAMILIES & MANUFACTURERS.

THESE WORLD RENOWNED SEWING MACHINES

Were awarded the highest Premium at the World's Fuir in London, and six first premiums at the New York State Fair of 1866, and are

Celebrated for doing the best work, using a much smaller needle for the same thread than any other machine, and by the introduction of the most approved machinery, we are now able to supply the very best machines in the world. These machines are made at our new and

under the immediate supervision of the President of the Company, Elias Howe, Jr., the ORIGINAL INVENTOR OF THE SEWING MA-

spacious Factory at Bridgeport, Conn.,

CHINE.

They are adapted to all kinds of Family Sewing, and to the use of seamstresses, dress makers, tallors, manufacturers of Shirts, colars, skirts, cloaks, mantillus, clothing, hats, caps, corsets, boots, shoes, harness, Saddles, linen goods, umbrellas, parasols, etc. They work equally well upon silk, linen, woolen and cotton goods with silk, cotton or linen thread. They will seam, quilt, gather, fell, cord, braid, bind, and perform every species of sewing, making a beautiful and perfect stit h, alike on both sides of the articles sewed.

The Stitch invented by Mr. Howe, and made on this Machine, is the most popular and durable, and all Sewing Machines are subject to the principle invented by him. SEND FOR A CIRCULAR
