Temperation Demograf DEAD VIOLETS.

Let them lie—ah! let them lie!
Pincked flowers—dead to morrow;
Lift the lid up quietly,
As you'd lift, the mystery Of a buried sorrow.

Let them lie-the fragrant things, 3. All their souls thus giving; Let no breeze's ambient wings, And no useless water-springs, Mock them into living.

They have lived—they live no more; Nothing can requite them will For the gentle life they bore. Which to up-yield in full store It did so delight them.

Yea I wen, flower corses fair ! Twas a joyful yielding; Like some heroic, rare, That leaps boldly forth in the air , For its loved one's shielding.

Surely, ye were glad to die In the hand that slew ye; Glad to leave the open sky, And the sire that wandered by, And the bees that knew ye.

Giving up a small earth-place, a . . . Aud a day of blooming, Here to lie in a narrow space, Smiling in this smileless face With such sweet perfuming.

O ye little violets! dead, Confined from all gazes, We will also smile and shed , ; Out of heart flowers withered Perfume of sweet praises.

And as ye, for this poor sake, Love with life are buying, So; I doubt not One will make All our gathered flowers to take Richer, scent through dying.

Richer, seent through dying.

The leading claims to p 499 Broadway, N. Y., commenced manufacturing Pianos thirty-six years ago, and are one of the oldest houses in the country. They differed from the rest of the makers in this respect—they aimed to make the best instrument, and to sell it for the smallest profit. These Pianos to-day cannot be excelled. Their singing quality is pure, tull, and easily retained through the most lengthy passages. For power they are unparalleled, and are celebrated for their great brilliancy, exquisite touch, and clegance of style and fusish.—oct20 w4

In Half Rulesia, extra gilt 750
In Fall Russia 900 asked whether they would be allowed to carry their pet into the carriage with them. This was refused, and the two intending travelers went away. Some time after, they returned, one of them carried what appeard to be a baby, with its face carefully covered over. They took their tickets and were about to get on the train when the station-master who had not forgotten their previous request, advanced, and remarked, "Oh; what a beautiful child!" passed his hand over its head. A grunt of satisfaction was the reply to his careés.-The ladies finding that their scheme was discovered, preferred to abandon their journey rather than to travel without their strange companion.

Whatever may be said of the merits of the different sewing machines now before the public, there is certainly none that deserves more special mention than the Empire Sewing Machine. This machine is not only unsurpassed in simplicity, durability and beautiful stitch, and adapted to all kinds of family sewing, and noiseless when in operation, but is of superior workmanship, combining usefulness with elegance. It is, in fact, a sewing machine that every family would like to have .- Oct29 w4

Our Last new addition to our different styles is attracting the admiration of both critics and populace. We mention specially, some of the claims of this new Piano. Believing the exterior should be as beautiful to the eye as melody is to the car, we have paid great attention to getting them up in a style that is conceded by all who have seen them to be the handsomest Piano Forfs, made. They are an entirely new style, with four full round corners, heavily carred legs and tyre, base richly moulded, and contains our latest improved new scale and action. The tone is melodious, and its adaptability to passages of every shade of expression, from the softest murrants, the Cressendo, and the FF, gives the performer every advantage of the Concert grand.—Price \$500.

J. Thomas Patent Atmospheric CHURN DASH!

· Patented May 7, 1867.0 < The most Important and Valuable Invention of the 19th Century.

1. This Dasher is superior to any other, by being as simple as the old Dasher, and combining the atmospheric principles therewith, and the Butter Gatherer.

2. It is superior to all others, inasmuch as the same power applied to this in this mechanical operations will make one fourth more reciprocations.

3. It is superior to all others, inasmuch as it produces the Butter in a much shorter time.

4. It is superior to any other, inasmuch as it produces a much better quality of Butter.

5. It is superior to, any other Patent Churn, inasmuch as it is 500 per cent, cheaper than any other.

It is well known to Dairymen and others, that Butter is contained in minute globules or sacks, covered with a membrane, and requires the action of all to prepare the covering to be removed by friction. The Scientific American says:

the covering to be removed by friction. The Scientife American says:

"If cream is dashed against a hard substance, or mashed between bars or rollers, it breaks the globales and becomes oily, by destroying the grain. It should be thrown into currents and icounter currents by the action of air, causing a friction by the action of the currents against each other, removing the covering without breaking or bursting the globules,"

This is the principle which the inventor of this Dash endeavored to keep in view, and, the result shows a much larger yield of Butter obtained in less time than by any other Dasher.

Experiments have proven that any other method except pumping air through the cream, will not penetrate sufficiently to axyrenize all the globules preparatory to concentrating the Butter. Throwing it into the air by chappers or old fashioned Dashers, does not sufficiently expose it to the air to bring one the Butter.

The above Patent, Dasher has been purchased for Susquehanna County by the undersigned. The process of churning can be seen drany time, in solidss Churn, at Baldwin, Allen & McCain's store. An agent will canvass the county soon as possible, to sell the Dasher for individual rights; also township rights will be solid. Montrose, July 23, 1867.—tf

FOUTZ'S CELEBRATED HORSE AND CATTLE POWDERS.

This preparation, long and favorably known, will thoroughly rejuvigorate broken-down and low-spirited horses, by strenthening and cleansing the stomach and intestines.

It is a pure preventive of all diseases incident to this animal, such as Lung Fever, Glanders, Yellow Water, Heaves, Cougns, Distemper, Fevers, Founder, Loss of Appetite and Vital Energy, &c., Its use improves the wind, increases the appetite, gives a smooth and glosey skin, and transforms the misgrable skeleton into a fur looking and spirited horse.

TO KEEPERS OF COWS, this preparation is invaluable. It increases the quantity and improves the quality of themilk. It has been proven by actual experiment, to increase the quantity of milk and cream twenty per cent, and make the better firm and sweet. In fattening cattle, it gives them an a petite, loosens their hide, and makes them thrive much faster

IN ALL DISEASES OF SWINE, such as Coughs, Ulcers in the Lungs, Liver, &c. this article acts as a specific. By putting from one half a paper to a paper in a barrel of swill the above discass; will be eradicated or entirely prevented. If given in time, a certain preventive and cure for the Hog Chole ra.
