More Swindles.

A batch of new swindling establishments under the guise of " Gift Enterprises," &c., have been started recently which the people are advised to beware of. We repaired to the spot, and found a car filled with Salt petre, on fire, near the freight Depot, near it stood the wreck of the engine Montrose, and pieces of the wreck were scattered all around. Upon inquiry, we ascertained the following particulars of this sad affair. The engine was fired up and nearly ready to start, at the time of the explosion. Three men, named Micheal Maley, Peter McCormick and John McGovern, employed about the yard, had entered a caboose near the en-gine, to warm and eat their supper, Pat-Jan. 12, 1868, by Rev. J. F. Wilbur, Mr. rick Marphy, Engineer on the Montrose was also in the caboose. A few moments before the explosion took the oil cup, and went out to oil the engine. The next seen of him, he was laying some two rods distant from the engine, a mangled, lifeless corpse.

The men represent the explosion as being terrific, lifting the cars up, and throwing them in all directions.

The car loaded with salt petre was in the immediate vicinity, and took fire by the explosion, and car and contents were entirely consumed.

The upper portion of the engine was blown off, and presented a terribly shattered appearance.

The Engineer Murphey was the only person in or about the Engine. He is a single man and boarded in Hyde Park. land, Dec. 24th, 1867, by Gaylord Curtis, We saw his remains as they lay in the Esq., GEORGE E. PORTER, of Harmony, Depot a short time after his death, and and ORAM SKINNER, of the former place. they were truly a sad sight. The top portion of his head was blown off, his face destroyed, and his body flattened out and mutilated. There was scarcely enough of bim left for his friends to recognize him by.

These are all the essential facts, and are as full as we could gather them this morning

This is the second explosion that has occurred in the Yard. The "Virginia" exploded in 1859, when three persons were killed .- Scranton Register.

The true value of Machinery applied to Watchmak-ing is not that by its use Watchca are made rapidly, but that they are made correctly. Very few people know why a Waitham Watch should be superior to any other. In the first place, at Waitham the Watch is re-garded as only a machine, on mechanical principles.— If the watches are good, it is because the machinery is good. Of course there must be no defect in the sizes or shapes of the pieces of which it is composed—noth-ing wanting in their properties, and no error in their positions. These points once thoroughly metiled, is rests wholly with the machinery, constracted with is-finite diversity of formand function expressly for the purpose, to produce the finished pieces. By means of multiplying guages and microscopes, tests and inspec-tion for the detection of wear in the cutting tools, and for faults or flaws in steel or stone are made to accom-pany he work in every stage from beginning to end.— As a necessary result, the watch goes together a perfect machine. Every part is found to fit properly in its place. Every pin may be pashed till it pinches, and er-ery scrow turned home. Instead of a sluggish and feer ble action, the balance, even under the pressure of the lightest mainpring, vibrates with a wide and free mo-tion, and the beat has the clear ringing, sound always eharacteristic of the Waith and wide is and free mo-ton and the beat has the clear ringing sound always eharacteristic of the Waith and the machine is a timekeeper irom the start. This watem is unknown in forcier countries, and is At the recent International contest, in the Paris Expo sition. tion, and the ocat has do clear inight, noted where characteristic of the Waltham Watch. The machine is a timekeeper from the start. This system is unknown io foreign countries, and is entirely original with the Waltham Company. The Company claim that by it they produce watches that cannot be equalled for every quality which makes a watch valuable. Simple in plau and correct in princi-ple, the movement is not only beautifully finished, sub-stantial, accurate and cheap, but is uniform in the mi-nutest details, not easily damaged, and when repaired always as good as new. There are different grades of finish in the different varieties of watches made by the Waltham Company, as there are different sizes and shapes to suit all tastes and means; but every Watch that bears the gennine trademark of "Wantfast", is guarantied to be a good one, and nobody nees by afraid to buy it.
