THE NEW TO American Cyclopædia: . A POPULAR DICTIONARY OF GENERAL KNOWLEDGE

KNOWLEDGIE

Edited by George Righer and Chan es A. Dana, aided by a numerous select corps of writers, in all branches of science, art, and literature.

In 16 large volumes, 870. 730 double-column pages in each volume.

In 16 large volumes, 800. 750 double-column pages in cach volume.

The leading claims to public consideration which the New American Cyclopedia possesses may be thus briefly stated:

1. It surpasses all other works in the fulness and ability of the anicles relating to the United States.

2. No other work contains so many reliable biographies of the leading men of this and other nations. In this respect it is far superior even to the more bulky Encyclopedia Brittanica.

3. The best minds in this country have been employed in curiching its pages with the latest data, and the most recent discoveries in every branch of manufactures, mechanics, and general elemes.

4. It is a library in itself, where every topic is treated, and where information can be given d which will enable a student. If he is so disposed, so consuit other nuthorities, thus affording him an invaluable key to knowledge.

with enable a student, as the shorting him an invaluable key to knowledge.

5. It is nearly printed, with readable type, on good paper, and contains a most copious index.

6. It is the only work which gives any thing approaching correct descriptions of cities and towns of America, or emi-races reliable statistics showing the wanderini growth of all sections.

Beery one that reade, every one that mingles in society, is constantly meeting with allusions to subjects on which he needs and desires further information. In conversation, in trade, in professional life, on the farm in the family, practical questions are continually arising, which his man, well read or not, can always satisfactorily answer. If facilities for reference are at hand they are constituted, and not only is the curiosity gratified, and the stock of knowledge increased, but perhaps information is gained and ideas are suggested that will directly contribute to the business success of the party concerned.

directly contribute to the business success of the party concerned.

A Cyclopædia is pre-minently the work for our country and generation. This is the age of steam. No one has time to grope among a hundred different works for every little fact required, without the certainty of fit ding it at last. With a C clopædit, embracing every cone ivable subject, and having its topics alphabetically arranged, not a moment is lost. The matter in question is found at once, digested, condensed, stripped of all that is irrelevant and unnecessary, and verified by a comparison of the best authorities. Moreover, while only men of fortune can collect a library complete in all the departments of knowledge, a Cyclopædia, worth in itself for purposes of reference at least a thomsand volumes, is within the reach of all—the ciert, the merialit he professional man, the farmer, the mechanic lina country like ours, where the humblest may be called to responsible positions requiring intelligence and general in armation, the value of such a work cannot be over-estimated.

Piano. Believing the exterior should be as beautiful to the eye as melody is to the ear, we have paid great attention to getting them up in a rice that is conceded by all who have seen them to be the han somest Piano Forte made. They are an entirely new style, with four full round corners, heavily carved less and lyre, base richly moulded, and contains our latest improved new scale and action. The tone is melodion: and its adaptability to passages of every shade of expression, from the softest marmure, the tressendo, and the F F, gives the performer every advantage of the Concert grand.

FOR FAMILIES & MANUFACTURERS.

THESE WORLD BENOWNED SEWING MACHINES Were awarded the highest Premium at the World's Fair in London, and six first

premiums at the New York State Foir of 1866, and are Celebrated for doing the best work, using a much smaller needle for the same thread than any other ma-chine, and by the introduction of the most approved ma-hinery, we are now able to supply the very best ma-chines in the world.

These machines are made at our new and spacious Fuctory at Bridgeport, Conn., under the immediate supervision of the President of the Company,

Elias Howe, Jr., the DRIGINAL INVENTOR OF THE SEWING MA-

They are adapted to all kinds of Family Sewing, and to the use of scametresses, dress makers tailors, man-ufacturers of Shirts, collars, skirts, cloaks, mantillus, clothing, bats, caps, corsues, boots, shoes, harness, Sad-clothing, bats, caps, corsues, boots, shoes, harness, Sad-clus linen goods, umbrellas, parasols, etc. They work equally well upon silk, linen, woolen and cotton goods with silk, cotton or linen thread. They will seam, quilt, gather, fell, cord, 'raid, bind, and perform every species of sewing, making a beautiful and perfect stit h, nike on both sides of the articles sewed.

The Stitch invented by Mr. Howe, and made on this Machine, is the most popular and durable, and all Sewing Machines are subject to the principle invented by him. SEND FOR A CIRCULAR. SIBLEY & STOOPS,
