

The Popular Will.

The adherents of Congressional tyranny insist that as Congress represents "the people," its acts should not be questioned. But the figures show that Congress does not now represent the people. Seventeen States held general elections during the past year, and in them the vote stood: Democratic vote, 1,676,607; Republican vote, 1,554,945.

Congressional Review.

Some efforts are being made to admit Colorado into the Union as a State; but the Radicals indicate a determination that it shall only be admitted upon the condition that negro equality be engrafted upon it without reference to the wishes of the people. In the House a resolution that the seat of government ought to be removed to the valley of the Mississippi, has been rejected, 77 to 97.

The President has presented a message relative to the trial of American citizens in Great Britain. The House has referred the new evidence on impeachment to the Reconstruction Committee with leave to report at any time. Impeachment having died a second death, since the above reference, the committee will have nothing to report unless it be a solemn obituary.

The correspondence between the President and Gen. Grant in reference to the Stanton affair, has been presented to Congress, and ordered to be printed. The question of veracity between Johnson and Grant has been fully settled—all the other five members of the Cabinet having written letters which prove that the President's version of the matter is true and correct; Grant's contradiction remaining entirely unsupported.

Both branches spend much of the time discussing "reconstruction," and the question of excluding legally elected members from their seats—a Radical device to maintain their two-thirds majority.

Pennsylvania Legislators.

We find but little general news to report from the State Capitol. A bill has been read in place prohibiting railroad companies from locking car doors, or using oil or explosive fluids for lights.

An act repealing the celebrated liquor law of last year has passed the House. The Senate bill repealing the Gettysburg Lottery act of 1857, passed the House and goes to the Governor for signature. The auditor-general is authorized to seize the property and assets of the defunct corporation, and hold it for the benefit of the individuals who invested in it.

The following has unanimously passed both branches: Resolved, That our Senators in Congress be instructed and our Representatives in that body be requested to urge upon the Secretary of State of the United States the propriety and necessity of instructing our Minister at the Court of St. James to demand from the British government the release of American citizens, native or adopted by naturalization, imprisoned within that kingdom upon mere suspicion of political offence, and to insist upon the adoption of a fixed policy which will insure such privileges and immunities to our people as they may be justly entitled to.

Resolved, That the Secretary of the Commonwealth be instructed to forward a copy of this resolution to the Secretary of State, Hon. Wm. H. Seward, and the members of Congress. Lycoming county has been made a judicial district.

Death of Impeachment.

Within the past two weeks the radical world run riot upon a new impeachment idea. The fact that the President did not want a spy and enemy in his cabinet was seized upon as a pretext, and the revolutionists seemed confident that they could now impeach and remove the President. But the project again died from want of life. The dispatches of the 13th say that the Reconstruction Committee held a brief session this morning, all the members being present. Thaddeus Stevens stated that he wanted to bring the subject of impeachment to a test in the committee. He had prepared, he said, the following report to the house, and he would now take the sentiments of the members of the committee thereon: "The Committee on Reconstruction, to whom was referred the correspondence of Andrew Johnson, President of the United States, and U. S. Grant, general commanding the armies of the United States, having considered the same and the evi-

dence, do report that, in virtue of the powers with which your committee has been invested, they have fully examined the evidence before them, and are of the opinion that Andrew Johnson, President of the United States, is guilty of high crimes and misdemeanors, and therefore recommend the adoption of the following resolutions: Resolved, That Andrew Johnson, President of the United States, be impeached of high crimes and misdemeanors.

Upon a motion to lay the whole subject upon the table, the vote stood: Yeas—Messrs. Bingham, Beaman, Paine, Hulburt, Brooks and Beck; Nays—Messrs. Stevens, Boutwell and Farnsworth. So the entire matter was laid on table, and the committee adjourned.

"A Step Forward." We cut the following from our spirited little contemporary, the Philadelphia Morning Post: "Mr. Stevens' bill, giving the right of voting, in all Presidential elections and in all national questions, to every citizen without regard to color, is a step forward. We do not want Congress to abandon its duty to the disfranchised citizens of the North. Put State matters aside, and a colored man has just as much right to vote in Philadelphia for President or Congressmen, as a colored man has in New Orleans. That much, at least, Congress has the Constitutional power to give him, let State laws be what they may. We admit that the bill of Mr. Stevens is a 'step forward,' but not in the right direction. It is a step toward consolidation—toward the Federal Government, usurping all the reserved rights of the States, and crystalizing itself into a centralized despotism. The Post is in error when it claims for Congress the right to confer the ballot on the negro, 'let State laws be what they may.' We deny any such 'Constitutional power' for Congress.

Good Management. With the recurrence of each new year, our duty as chronicler of public events imposes upon us additional labor. We very naturally take a retrospect of the past, and feel solicitous for the future. Reviewing the history of the past few months, we find that no topic of conversation has been so generally discussed as that of Railroad Disasters. From a quarter of our exchanges record the continual occurrence of these appalling accidents; and one is loth to examine the list of mortality, lest the familiar name of some cherished friend, by consanguinity or otherwise, should unhappily present itself. But in the face of all these distressing calamities, a consolation is afforded in the conviction that strenuous exertions are put forth by the managers of some of the leading lines of railway to avert similar occurrences. Foremost of all ranks the Erie Railroad. Within the years '66-'67 no accident happened on this road by which the life of a single passenger was lost or even jeopardized. This certainly speaks well for its management, and deserves particular notice. That so great and important a connecting link in the chain of railroads uniting the West and East should escape the fate of its rivals, is almost miraculous; yet when we take into consideration the facts that the closest scrutiny is exercised in every department connected with the road—that the coaches and machinery are constructed in the most approved and modern styles—that every effort is advanced looking to the interest of its patrons, and the perpetuation of its proud position in the history of railroads, we are not at a loss to comprehend the secret of its success. It may in a measure be dependent upon good fortune; but able, prudent and thoroughly efficient management is unquestionably the prime cause of its total release from the recent calamitous experiences of other roads.

If managed upon a broad and popular basis, we do not hesitate to say that all our roads would shortly present as good a record as that of the Erie Railway, above given. The Georgia Injunction. In the case of Georgia vs. E. M. Stanton and Generals Grant and Pope, before the Supreme Court of the United States, Associate Justice Nelson yesterday rendered a decision dismissing the bill for want of jurisdiction, and at the same time the learned Justice remarked that this decision also disposed of the Mississippi case against Mr. Stanton, General Grant and Major General Ord. Although Chief Justice Chase did not concur in all of the reasons advanced by associate Justice Nelson, he assented to the conclusion; believing that the court had no jurisdiction in the matter.

The bill filed by the State of Georgia prayed for an injunction to restrain the defendants from executing certain parts of the acts of Congress, being apprehensive that injury to the State would thereby result. But according to law and precedent, in order to entitle parties to relief a case must be properly presented for the exercise of judicial power, and the case must refer to the rights of person or property, and not to political questions merely.

Of Interest to Everybody. Since the advent of the Star Shuttle Sewing Machine in the market, about one year ago, the manufacturers have sold about Fifteen Thousand, and such unprecedented testimonials of their intrinsic worth has prompted them to enlarge the machine, and otherwise improve it, that now the Star Shuttle Machine stands without a rival. Mr. Wilson deserves great credit for assuming the responsibility in putting a Lock Stitch Shuttle Sewing Machine in the market at such a low price, in direct competition with all the first-class and high priced machines.

Alabama Election. The Alabama constitutional election resulted in a defeat of the propositions, but the radicals now threaten to force it into operation by a resolution of Congress. As well might Congress vote to force negro suffrage upon Ohio, after its late rejection by a popular vote.

ITEMS.

It is reported that the city of Binghamton has given a Democratic majority at the late election. Sir David Brewster, the eminent English physician and scientific investigator, died on Monday evening. Another desperate effort was made on the police of Cork on Monday. The people were dispersed at the point of the bayonet. A number of gentlemen in Dublin, arrested some time ago for taking part in the Fenian funeral ceremonies, have been indicted by the Grand Jury.

The full vote of Masor, Elmore, Tallapoosa, Chambers, Bullock and Coosa counties, Alabama, amounts to 13,150, all negroes but 771. The "election" commenced in Alabama on the 4th. In Montgomery county only two out of some fifteen or twenty candidates are white.

The farmers in many portions of the West are still greatly incommoded by the want of water. Many of them are compelled to haul water for kitchen use and for their cattle. Iowa hunters find prairie chickens so numerous this season that there is no sport in killing them. They can be knocked down with a stick and bagged by the hundred.

During the stay of Admiral Farragut in Italy the fleet under his command will be stationed on the coast, between Genoa and Civita Vecchia. In Bridgeport, Conn., two boys, aged respectively eight and fourteen years, are reported to cook, wash and iron, and take care of their mother and brother, who are invalids. Miss Calahan, the poor girl who was first ravished by a negro and then thrown over a cliff at Frankfort, on the 31st ultimo, died of her injuries.

Alabama planters agree that free labor is cheaper than slave labor, but cannot be controlled and directed so as to meet the real exigencies of the farming season. The Kentucky delegation have received a telegram confirming the report that Senator Guthrie, of that State, has resigned his seat in the United States Senate. The Florida black and tanists have nominated Gillins (white) for Governor, Sanders (negro) for Lieutenant Governor, and Gibbs (negro) for Congress.

The Radical increased the national debt about twenty millions of dollars during the past month. But twenty millions, almost a million a day, is scarcely noticed. We judge from the immense sales that Mrs. S.A. Allen's Improved (new style) Hair Restorer or Dressing (in one bottle) is preferred by every one. Every Druggist sells it. Price One Dollar.—4w

Life has but few charms for the Dyspeptic, which is not to be wondered at when we take into the account the amount of bodily and mental suffering that this distressing malady generates. The Peruvian Syrup (a protoxide of Iron) has cured thousands who were suffering from this disease. The Alexandria Gazette says Captain Windsor has just returned from his plantation in Mississippi, and represents affairs in that State as in the most distressing condition. Splendid lands at forced sales bring comparatively nothing, and the captain witnessed the sale, a few days before he left there, of four excellent mules for \$12.

The Louisiana black and tanists have opened the way to a great fraud. They have passed an ordinance to allow a voter to vote in any parish upon the mere presentation of his registration papers. Under such a regulation the nigs can carry anything—they will hold out. In Montgomery, Alabama, on the 6th inst., 1,100 votes were polled. Only six white men voted, four of whom were Radical candidates. On the previous day only two white men voted, both Radical candidates. At Mobile, on the 4th inst., 3,572 negro votes and 53 white. This is Radical government.

BURLINGTON, Vt., February 10.—Miss Greenough, a young lady of this city, aged seventeen, was burned to death last night by her clothes taking fire, in consequence of the explosion of a kerosene lamp.

A young man named Keeley was shot some days since in Jilliard's saloon, in Honesdale, Wayne county, Pa. It appears he used insulting language to the proprietor's wife, and being ordered out a scuffle ensued, and Jilliard, in self defence, shot him.

It is reliably stated that General O. O. Howard, Commissioner of the Freedmen's Bureau, declared the other day at a meeting of the trustees of the so-called "Howard University," that he was in favor of practical amalgamation between the white and black races, and that he had no desire to conceal his views on that subject. A correspondent of the Chicago Tribune (Rad.) declares that Mrs. L. is hopelessly insane. Doesn't this look as if some of the loyal chaps are afraid of the disclosures promised, and hope to forestall public opinion?

PROOFS OF THE SUPERIORITY OF THE AMERICAN WATCHES. This country has reason to be proud of this splendid specimen of American operative genius and enterprise. That it will work a revolution in the watch manufacturing of the world, no one can doubt who examines the operations of the Watman establishment. For it turns out watch movements as fast about one half the cost of imported movements, and beside the most reliable of the machine made watches must give them a great advantage over all others wherever known. A good time piece of the machine made watches as as rare in the future as a good one of hand make has been heretofore, for machinery is arbitrary in its performance, and can make perfect articles just as well as one that is in order. It will carry the same amount of work as the best of the hand made watches, and will last as long. The American Enterprise watch will have the effect of driving out of market the thousands of cheap foreign articles, miscalled time keepers, by furnishing so excellent and economical a substitute.—N. Y. Times. We have had one of the works of this company in a case for some considerable time, and comparing them with former first class works of different manufacture succeeded by me, they have established our opinion of their superiority over any ever introduced for correctness in time pieces.—The Herald. We notice with regret (writing of the Paris Exposition) the absence of specimens of American manufacture, which although comparatively only of the fourth among us, is clearly producing results of the most satisfactory character. The watches manufactured by the Watman Company are certainly, so far as strength, durability, and excellence in time keepers are concerned, as good as anything produced by the French or Swiss manufacturers.—N. Y. Herald. The beauty, the precision, the greater cheapness, the uniform excellence of a watch constructed by machinery so exquisite that the mere spectacle of its operation is peculiarly gratifying to the American eye, is a public preference which will not be deceived.—Zephyrus Weekly.
