MONTBOSEY PENN'A:

WEDNESDAY, JAN. 12, 1870.

The Message.

We give a full summary of the Governor's message this week, which we are glad to say we think will be read with interest. We can overlook some of his crude attempts at unravelling the financial question of the National government, and fully appreciate the manner in which he boldly sets forth the criminal mismanagement of the State finances during the last year, and the frank acknowlegment of base intrigues and corrupt political Total in the Treasury during cliques, who brought his former administration into such disrepute.

Whatever the motives of the Governor Ordinary expenses paid duare we care not. We are ready to receive gring the year ending Nov. recommendations of reform from any source, and we shall be just as ready to applaud a determination to cut loose from Loans redeemed by the Comthe base Rings that controlled his last administration, as we were to censure him for being ruled by them. The vicious management of the public funds to which we have many times before referred is clearly and emphatically set forth in the following struthful paragraph, which is contained in his message, and we give it here that we may call the particular attention of our readers to it :

"I beg once more to remind the Legislature that the salary of the State Treasurer should at least be equal to that of the Governor. It is only seventeen hundred dollars, a sum entirely insufficient to command the services of any responsible man, who is required to furnish a bond with good and approved securities, for eighty thousand dollars, and to run the risk of handling at least five or six million of dollars per annum, without the unlawful use of the State funds, and subsidies from sources that dare not be revealed to the public, because they are positively prohibited by law, under penthis office, however poor they may have ded debt viz: been when they took charge of it, who 6 pr ct leans \$25,311,180 00 have not become rich. Then, in the name of the good people of Pennsylvania, I call upon the members of the legislature to rise above the murkiness of the polluted atmosphere of the past, to the true dignity of manhood and exalted patriotism, and purify the election of Treasurer, as well as that of every other officer her 30, 1868. within this Commonwealth, and punish Deduct amount redeemed at every one who tampers with the purity of elections, whatever may be his position

Governor's Message.

From the great length of the Message which would occupy three fourths of our paper if printed in full, we have concluded to give our readers a summary which the report of the Superintendent of Comly as much or more than would be read if given in full.

The Governor after the usual premble in alluding to the immense resources of our commonwealth, takes up the subject of finance, and from the Auditor General and State Treasurers report he makes the following statement: RECEIPTS.

Balance in Treasury, Nov. 30, 1669, Ordinary receipts during the fiscal year ending Nov. 30

Balance in Treasury, Nov. \$1,400,862 49 30, 1869,

It will be observed from the above, that part of the loans and part of the interest are paid at the Treasury, and part of both by the Commissioners of the Sinking Fund. This produces a complication of accounts; which, in order to avoid and to simplify the financial statement. I recommend that authority be given by law to charge the Commissioners with the whole amount of the state debt, and also with all the money applicable to the payment thereof, and that they alone be credited with all payments on both principal and interest of the state debt.

The Governor suggests the propriety of applying the surplus funds of the treasury ommendation that such a law may be

them to make quarterly settlement in the ken of their decease by the legislature. Auditor Generals office the same as other efficers of the state are required to do. COMMON SCHOOLS.

The following statistics are drawn from

There are within the state 1,971 school districts; 13,936 schools; 2,445 graded schools; 12,900 school directors; 76 superintendents; 17,142 teachers, and 815, 753 pupils. The average cost of tuition for each pupil is ninety seven cents per month. The whole cost of tuition for the year is \$3,500,704 26. Total cost excluding expenditures of all kinds during the year \$6,986,148 92. Estimated value of school property \$14,045,632.

There are five districts in the state that have not conformed to the school law. There are four normal schools which have had an attendance of 10,237 students during the past year of whom 321 have graduated. A Normal school has been recognized at Bloomsburg during the past Of the whole number of children in the state (975,753,) there are 815,752 attending publicschools, 85,000 attending private schools, and 75,000 not attending schools of any kind, and the attention of the legislature is called to the subject of

non attendance. SOLDIERS' ORPHANS' SCHOOLS. The whole number of children admit-

ted into these schools from their origin to the 31st day of May, 1869, is four thousand five hundred and nine : of whom three hundred and seven have been discharged on order, five nundred and eighleen on age, and fifty three have died; ma-king a total of eight hundred and seventy right, which left three thousand six hundred and thirty one in the schools at the end of the year. Up to May 31, 1869, the number of discharges from the schools have exceeded former estimates by one hundred and seventy five. The number of applications for admission, on file and not acted on, was seven hundred and one; some from every county in the state ex-

cept six.

The entire cost for maintenance, education, clothing and general expenses, for the year ending May 31, 1869, differs but little from the original estimate of the Superintendent and Amounts to 8500,971 63

In his last annual report the Superintendent estimated the expenses for the current year terminating May 31, 1870, at \$494,700. The sum aporopriated for that year, by act of April 16, 1869, was \$450, 000. As the Superintendent reports the than Catawba. expenses will not materially vary from his estimate, there will therefore be a deficit

of \$44,700 for the current year, to be provided for during the present session. For the maintenance of these schools during the year ending May 31, 1871, it is estimated that \$534,500 will be required. Which sum I recommend to be ap-

officers rendered necessary by the war, Christmas day. convenience of the soldiers, have been discontinued, and the duties formed by them as well as the official books and papers, have been transferred to the Adjutant Gen. department.

An unusual martial activity prevails throughout the state, but more particularly in Philadelphia. The encouragement which has been afforded to the uniformed militia has been responded to with alacrity, and is exhibited as follows: In 1866 there were eight volunteer companies; in 1867 thirty eight; in 1868, sixty seven and in 1869, one hundred and eighty four. No less than one hundred and seven companies were organized during the year ending November 30, 1869, of which fifty six are in Philadelphia, and

fifty one in other parts of the state.

The Governor enruestly recommends that the legislature take into immediate consideration the subject of furnishing a suitable home for the soldiers who have fought our battles for us where they shall be amply provided with the necessary comforts of life, and no longer be compelled to be pensioners upon the scanty charity of the world. This is a debt the \$869,482 25 state absolutely owes, and no time should be lost in its honorable liquidation.

He also urges a revision of the insurance companies of this state, so that the same confidence may be established which now exist in favor of companies of neighboring states, and he carnestly repeats the 1877, interest 6 per ct.
