New Hubbard Mower. Don't fail to see the New Habbard Mower, even if you don't want to buy. The changeable speed of its cutters from fast to slow, or slow to fast, while the machine is in motion; its noiseless motion, continuous drive wheels, the manner in which all the shafting and gearing is so can get to it, all show the wonderful skill that makes the New Hubbard stand so pre-eminent among all competitors. Improvement

We noticed in passing through the borough of New Milford last week that there had been seven new dwelling houses erected 'this spring beside several other bouldings and a good amount of repairing. We were informed that there were to be several other dwellings built this full. New Milford stands abead of any other borough in this county for proportionate improvements.

—A grand match game—best two in three—will come off the Fourth. The "rubber" game between the "Hing masters" and the "common herd" of the Republican party on the adoption of the Crawford County System of delegate elections takes place on that day, as we see by a call of the committee. As it now stands, they are "game and." An exciting time may be expected, if not very interesting. The stakes are neavy, and the contest will be desperate. But we advise our friends to be careful how they risk much money on the "game,", as it has the reputation of being a jockey contern.

Dr. Thayre has the reputation of being a first class caterer to the popular taste for athletic amusement. Some of the members of the troupe are well know to the public as skillful and daring performers. Mr. Stickney has poised his body upon those prancing steeds for many years, and the wonder is that he has not long ago broken his neck, riding in that reckless manner. We mention with pleasure that the gentlemanly advertising agent, Mr. Barry, who called

Disastrous Fire at Binghamton.

\$41,500.

At about a quarter past two o'clock, on Sunday morning, a fire broke out in Le Roy Place, Court street, at the eastern bank of the Chenango canal, which proved to be a very difficult fire for the firemen to contend with.

The exact location of the fire could not be as

certained, and the immense flood of water was kept upon the building for two hours, until smoke no longer issued from the crevices. At Washington, 95. no time did the fire break out at the windows, or through the roof. The water thrown into the building rushed out of the front way with such force and volume to carry away the timbers from the dock of the canal for four or five rods, made the same remark that Anaxagoras and loosened them some distance further. For some time this stream of water was so hot, when It reached the street through the buildidg, that person could not stand in it.
