The Tomato.

The tomato is one of the plants on which the bud, the blossom, and the green fruit may be found in perfection at the That pussy would run to see what was the matsame time. The stem and leaves green ; the blossom vellow; and the fruit red. But ere she was scated all nicely within it, nature these colors are harmonious.

a fragrant odor. For delicious sweetness. we prefer the rose decidedly.

The poorest quality of the fruit is that Now, dear little Lizzie had gathered some most which is filled with water and seeds; the And carefully shaped them in frame-work and best is fleshy, sweet, and nearly solid .-

A little, wrinkled, sonr, watery tomato, A little, wrinkled, sonr, watery tomato, is about as mean an article of food as can Her affectionate heart on some kindness intent: pickled, or preserved, and still find favor The paste neath the mosses to harden and dry with the multitude. Sliced tomato, dress-And her light little heart bounded happy and ed with sugar, pepper, salt, and a little vinegar, is not bad to take. You may add In hope of the pleasure that soon was to be if you please a little oil and mustard without rendering it unpalatable to certain But on that still night, when the children were tastes. Or you may take it raw if you prefer. It is not poisonous taken in that And the mischievous mouse from his covert was

green fruit is the best. For general use. Then spying a basket high up on the bed, large, smooth red holds its own against "I will climb up, and see what is in it?" he said The yellow generally contains | No sooner 'twas said, than 'twas speedily done more acid, more water, and less flesh than "Hurrah!" said the mouse; "here is capital fun! the red. In flavor it is also inferior. Our The paste in these mosses is surely the best,

The tomato does not require a rich soil. Heavily manured land produces a large I know they will say I deserve to be beaten, growth of stem, without a corresponding quantity of fruit. The fruit itself is inferior if grown under such circumstances. A tolerably rich, sandy soil, seems to be best adapted for the perfection of the fruit. We have seen some very fine specimens grown in the micaccous soil around Of any one's pleasure, save only himself. Philadelphia. The plant requires warmth and moisture. A cold, wet clay, or heavy limestone soil is not well adapted to this That somebody soon would be up in the morn vegetable.

and mellowed before the plants are set in He hurried away from the scene of disaster. The best time to plant is immediately What happened thereafter it grieves me to tell, before, not after, a rain, Should the soil be dry, make a hole several inches in diameler, fill with water, and when the water has been absorbed, set the plant. By Her late happy spirit was filled with dismay. by the other it is often stinted. Clay soil especially is apt to bake around the plant, if the transplanting is done after the soil is soaked with rain.

The tomato is quite sensitive to frost, and cannot be safely set out in open air till after the Spring frosts are over. The earliest fruit, however, is so much

better than the late, that a gardener may When over your mischief the dear child was well risk an early transplanting. A little pains to cover the plants on nights that Perhaps you repented the cause of her pain threaten frost, will in the end be abundantly repaid. Half a newspaper creased And Lizzie, be warned by the fate of your most and laid like a roof over each plant, will shield it from a pretty heavy frost. A clod When next you are tempted to make fancy on each side will hold the paper in the place. In this way hundreds of plants can be covered or uncovered in an hour. The man who is unwilling to take a little extra trouble occasionally, had better not have a garden. Gardening is surely not

The soil around the roots ought to be frequently stirred, to keep it loose and free from weeds. In large lots this can be

wires fastened to these stakes along the a Cairo youth, which will bear telling rows. Others put up small trellises, and about. train the vines on them. Others put a take four or five feet from each plant and ite the plant to it.

The youth, like himself, was fishing. Houston on the wharf boat, and the boy on a wood boat moored just below. At

-Riverside Magazine. Ancedote of Sam. Houston.

Old Sam Houston, of Texas, used to done best with a cultivator or small plow make it a point to stop at Cairo, some-followed by the hoc. make it a point to stop at Cairo, some-times for three or four days, on his way followed by the hoe.

The branches should be kept off the ground, in order to secure the best quality of fruit. Some gardeners drive in ty of fruit. Some gardeners drive in stern guards of a wharf boat. On one occasion of this kind he had a set to with

in either case the plant gets more air the interesting juncture of a bite at the lence.

"Now look here old Skeezicks," cried woody fibre.

The tomato of to-day is a much finer fruit than that of twenty years ago; and believe that by proper cultivation it may be developed into something finer still creature gave a sudden lurch, and pulled

hands into the river.

I subsequently heard Houston detail the "set to," and he did it in a style decidedly characteristic. Concluding the story he said:
"I have met men in debate at the bar,

Eddy's Message,

The Montrose Democrat the soil, when they might save time and make him a kite. It being finished, his money, and labor—and be richly reward—od in the end, by getting the best that is and a lead pencil, writing on his kite. and a lead pencil, writing on his kite.

After dinner, in Trushed Eddy with shining eyes and glowing cheeks, exclaim

ing:

"What, my dear? What have you sent? and where?"
"Why mamma, I wrote on my kite, 'Won't God please take good care of papa, and sond him back to mamma and Eddy?' and then I sent up my kite; and when i got np very high, I cut the string; and I guess God has got it by this time.

"Ab, little Eddy! God is very near every one of us, and our message need not be written on paper, or sent up about the clouds, in order that he may get them. He knows our thoughts before we speak them. Let us try to make them good and pure." The Nursery.

Hot Summers. From the published records kept in Nuremburg, in Bayaria, we translate, says the Detroit Free Press, the following interesting facts relating to extremely hot

easons in times past:
In the year 1132 the earth cracked by E FANCY DRINK,

In 1648 there were 58 consecutive days of extreme heat.

The years 1678 was very hot, and as

were the first three years of the eighteenth In 1718 it did not rain a single time from April until October. The growing grain was burnt, the rivers dried up, the theatres (but wherefore is not stated) were closed by command of the police The thermometer showed 36 degrees Reaumer, equivalent to 213 degrees Fahrenheit. In irrigated gardens the fruit trees bloomed twice,

In 1723-24 there was very great heat. dry, the growing grain being absolutely alcined. It did not rain for many months. The 1748, 1754, 1760, 1767, 1778 and 773 were also years in which summers

ere extremely hot. In the famous comet year-1811-the summer was very warm, and the wine produced that season was considered very recious. In the year 1818 the theatres had to be

closed on account of the heat, the highest temperature being 35 Reaumer, or 111 During the three days of the Revolu-tion of July, 1830, the thermometer stood at 36 degrees Centigrade-about the same

as 98 Fahrenheit.

seasons in times past:

In the year 1132 the earth cracked by reason of the heat. the wells and streams in Alsaco all dried up, and the bed of the river Rhine was dry.

In the year 1152 the heat was so great that sand exposed to the sun's rays was bot enough to cook an egg.

In 1160 great numbers of soldiers in the campaign against Bela, died from the effects of the heat.

In 1276-7 the crops of hay and oats failed completely.

In the years 1303-4 a man would have crossed, dry shod over the rivers Seine, Loire, Rhine and Danube.

In the years 1293-4 a multitude of animals perlshed by the means of the heat, which was so great that the harvest dried up.

In 1440 the heat was extraordinary.

In the years 1539, 1540, 1541, all the rivers were nearly dried up.

In 1615-16 there was a great drouth, which extended over nearly the whole of Europe. In 1615-16 there was, in Italy, the Netherlands and France, an overpowering heat.

In 1648 there were 58 consecutive days of extreme heat.
