Hints About Housekeeping. We will give to intellect, to religion and

in the kitchen have a great deal to do in

comfort and happiness somewhere else. and profound mysteries of the kitchen.

See to it, all ye who are mothers, that your daughters are all accomplished by an experimental knowledge of good house-

keeping. Hilling Corn.

portion of the agricultural and horticultural press, it is now pretty well understood that it will not do to continually dream of ambition over, sick and sad he plongh and injure the surface roots of went back to Ashland, to find that the tion? fruit trees in the orchard. But we have domestic drudge called by the holy name heard intelligent men say that though of wife had reared up for him a race of they would disturb an orchard as little as degenerate, wayward children. He was possible in this way, yet corn was quite filled with the bitterness of disappointanother matter. But the laws which gov- ment. But they measured the depth of the mother's humiliation. ern the nutrition of plants are pretty much the same all through. Roots love darkness, and yet wish to be

as near as possible to the surface; and er that made one son crazy; another a bether it is the root of an apple tree or the root of a cornstalk, makes no differeys and gamblers of the rest ence in the working of this law. If we plough deep and cut off the surface roots. the deeper ones are unable to reap any covered by the soil ploughed over them are in just the same condition. This is the "science" of the thing. But better than all this is the experience of those who have tried the matter by confict. who have tried the matter by careful and intelligent experiments. So far as we thirst at sweet and pleasant streams whose know. every such test has resulted in fa-

vor of flat culture and against hilling. It is very fashionable to rail at "mere theorists," yet we believe that many of our absurdest practices have resulted in the most commonplace theories, and this is one of them. Some one probably noted his misdeeds live after him .- Mrs. E. C. the little shootlets coming out of the Stanton. joints above the soil, and thought they wanted earth to cover them. Hilling was started in the "theory" that it was "helping nature ;" or it might have started with some lazy fellow who thought he way of administering salt to our domeswould not hoe or harrow early, but wait a tie animals, and also the question of little longer, and then one good plough- whether they should have salt at all, we ing would do the whole job.

However, no matter how it originated, the rounds of the agricultural papers. it is a mistaken and bad practice. should be left to go the way of many absurd thed these questions, and we think no things.—Forney's Weekly Press. I stock or other farmer, who has ever tried
