It is more pelatable than any now to use. proportion of spirit. It is more pelatable than any now to use.

Buchu, as prepared by Druggista, is of a dark color. It is a plant that emits its fragrance; the action of a fame destroys this (its active principle), leaving a dark and gluinous decoction. Mine is the color of ingredients. The Buchu is my preparation predominstes; the smallest quantity of the other ingredients are added, to prevent fermentation; upon inspection, it will be found not to be a Tincture, as made in Pharmacopea, nor is it a Syrup—and therefore can be used in cases where fever or infammation exist. In this you have the knowledge of the ingredients and the mode of preparation.
